INDEPENDENT AUDITORS' REPORT

Honorable Mayor and Members of the City Council City of Mt. Vernon, Illinois

#### Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the City of Mt. Vernon, Illinois, as of and for the year ended April 30, 2019, and the related notes to the financial statements, which collectively comprise the City of Mt. Vernon, Illinois' basic financial statements as listed in the table of contents.

#### Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

#### Auditors' Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit

also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

#### Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the City of Mt. Vernon, Illinois, as of April 30, 2019, and the respective changes in financial position, and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

#### Change in Accounting Principle

As described in Note 1 to the financial statements, the City of Mt. Vernon, Illinois adopted the provisions of Governmental Accounting Standards Board Statement No.75 "Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions", Government Accounting Standards Board Statement No. 85 "Omnibus 2017" and Government Accounting Standards Board No. 86 "Certain Debt Extinguishment Issues". Our opinion is not modified with respect to this matter.

#### Other Matters

#### Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis and other required supplementary information on pages 4 through 21 and 96 through 125 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

#### Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the City of Mt. Vernon, Illinois' basic financial statements. The introductory section, combining and individual nonmajor fund financial statements, and statistical section, are presented for purposes of additional analysis and are not a required part of the basic financial statements. The schedule of

expenditures of federal awards is presented for purposes of additional analysis as required by the Title 2 U.S Code of Federal Regulations Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, and is also not a required part of the basic financial statements.

The combining and individual nonmajor fund financial statements and the schedule of expenditures of federal awards are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the combining and individual nonmajor fund financial statements and the schedule of expenditures of federal awards are fairly stated in all material respects in relation to the basic financial statements as a whole.

The introductory and statistical sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we do not express an opinion or provide any assurance on them.

#### Other Reporting Required by Government Auditing Standards

In accordance with Government Auditing Standards, we have also issued our report dated October 11, 2019, on our consideration of the City of Mt. Vernon, Illinois' internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the City of Mt. Vernon, Illinois' internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with Government Auditing Standards in considering the City of Mt. Vernon, Illinois' internal control over financial reporting and compliance.

### CITY OF MT. VERNON, ILLINOIS MANAGEMENT'S DISCUSSION AND ANALYSIS April 30, 2019

This section of the City of Mt. Vernon, Illinois' annual financial report presents our discussion and analysis of the City's financial performance during the fiscal year that ended on April 30, 2019. Please read it in conjunction with the City's financial statements, which follow this section.

#### FINANCIAL HIGHLIGHTS

- The total governmental activities experienced a 58.13% decrease in the Change in Net Position, moving from \$10,736,605 at April 30, 2018, to \$4,495,389 at April 30, 2019. This is mostly due to the implementation of GASB 75. Business-type activities showed a 10.30% increase in Change in Net Position.
- Fiscal year 18-19, governmental activities' sales tax revenue increased by 29.08%, property taxes decreased 6.20%, other use taxes showed slight increases.
- For the fiscal year ended April 30, 2019, the City implemented GASB Statement No. 75, Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions. This standard establishes standards for governmental employer recognition, measurement, and presentation of information about other postemployment benefits (OPEB). The implementation of this standard required restating prior balance sheet balances. As a result of recording the actuarily determined OPEB liabilities and deferred outflows, the net prior period adjustment was a reduction in equity of \$10,712,082, \$9,100,163 for governmental activities and \$1,611,919 for business-type activities. See Note 13 for more details.

#### OVERVIEW OF THE FINANCIAL STATEMENTS

This annual report consists of four parts - management's discussion and analysis (this section), the basic financial statements, required supplementary information, and an optional section that presents combining statements for nonmajor governmental funds. The basic financial statements include two kinds of statements that present different views of the City.

- ➤ The first two statements are government-wide financial statements that provide both longterm and short-term information about the City's overall financial status.
- ➤ The remaining statements are fund financial statements that focus on individual parts of the City government, reporting the City's operations in more detail than the government-wide statements.
- ➤ The governmental funds statements tell how general government services like public safety were financed in the short-term as well as what remains for future spending.
- ➤ Proprietary funds statements offer shortterm and long-term financial information about the activities the government operates like businesses, such as the Public Utilities Fund (Enterprise) and the Health Insurance Fund (Internal Service).
- > Fiduciary funds statements provide information about the financial relationships - like the retirement plan for the City's employees - in which the City acts solely as a trustee or agent for the benefit of others, to whom the resources belong.

The financial statements also include notes that explain some of the information in the financial statements and provide more detailed data. The statements are followed by a section of required supplementary information that further explains and supports the information in the financial statements. Figure A-1 shows how the required parts of this

annual report are arranged and relate to one another. In addition to these required elements, we have included a section with combining statements that provide details about our nonmajor governmental funds, each of which are added together and presented in single columns in the basic financial statements.

Figure A-2 summarizes the major features of the City's financial statements, including the portion of the City government they cover and the types of information they contain. The remainder of this overview section of management's discussion and analysis explains the structure and contents of each of the financial statements.

#### Government-Wide Statements

The government-wide statements report information about the City as a whole using accounting methods similar to those used by private-sector companies. The statement of net position includes all of the government's assets and liabilities. All of the current year's revenues and expenses are accounted for in the statement of activities regardless of when cash is received or paid.

The two government-wide statements report the City's net position and how it has changed. Net position - the City's assets and deferred outflows of resources, less its liabilities and deferred inflows of resources - is one way to measure the City's financial health or position.

- Over time, increases or decreases in the City's net position is an indicator of whether its financial health is improving or deteriorating, respectively.
- To assess the overall health of the City you need to consider additional nonfinancial factors such as changes in the City's property tax base and the condition of the City's roads.

The government-wide financial statements of the City are divided into two categories:

- Governmental activities Most of the City's basic services are included here, such as the police, fire, public works and parks departments, and general administration including Internal Service Fund Activity. Sales, use, and property taxes, charges for services, and state and federal grants finance most of these activities.
- Business-type activities The City charges fees to customers to help it cover the costs of certain services it provides. The Public Utilities and Sanitation Funds are included here.

#### Fund Financial Statements

The fund financial statements provide more detailed information about the City's most significant funds - not the City as a whole. Funds are groups of related accounts that the City uses to keep track of specific sources of funding and spending for particular purposes.

· Some funds are required by state law and by bond covenants.

• The City Council establishes other funds to control and manage money for particular purposes (like the Revolving Loan Fund) or to show that it is properly using certain revenue sources (like the Community Development Assistance Program Fund).

The City has three kinds of funds:

- Governmental funds Most of the City's basic services are included in governmental funds, which focus on (1) how cash and other financial assets that can readily be converted to cash flow in and out and (2) the balances left at year-end that are available for spending. Consequently, the governmental funds statements provide a detailed short-term view that helps you determine whether there are more or fewer financial resources that can be spent in the near future to finance the City's programs. Because this information does not encompass the additional long-term focus of the government-wide statements, we provide additional information at the bottom of the governmental funds statement, or on the subsequent page, that explains the relationship (or differences) between them.
- Proprietary funds Proprietary funds are used to account for services primarily supported by user fees. The proprietary fund financial statements are prepared on the same long-term focus as the governmentwide financial statements. The City maintains the following two types of proprietary funds.

Enterprise funds are used for activities that primarily serve customers outside the governmental unit. The enterprise funds generally provide information similar to the business-type activities column of the government-wide financial statements, but provide more detail and additional information such as cash flows. Any reconciliation necessary between the enterprise funds and the business-type activities column of the government-wide financial statements is provided with the fund statements. The City's enterprise funds are the public utilities fund and the sanitation fund. The enterprise funds are considered to be major funds of the City.

Internal service funds are used for activities where the primary customer is the City itself. Because the primary customers of the internal service funds are the governmental activities, the assets and liabilities of those funds are included in the governmental activities column of the government-wide statement of net position. The costs of internal service funds are allocated to the various user functions on the government-wide statement of activities. The City has one internal service fund, the health insurance fund.

• Fiduciary funds - The City is the trustee, or fiduciary, for its fire and police pension plans. It is also responsible for other assets that, because of a trust arrangement, can be used only for the trust beneficiaries. The City is responsible for ensuring that the assets reported in these funds are used for their intended purposes. All of the City's fiduciary activities are reported in a separate statement of fiduciary net assets and a statement of changes in fiduciary net assets. We exclude these activities from the City's government-wide financial statements because the City cannot use these assets to finance its operations.

Notes to the Financial Statements

The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements. The notes to the financial statements follow the basic financial statements.

#### Other Information

In addition to the basic financial statements and accompanying notes, this report also presents certain required supplementary information ("RSI") concerning the City of Mt. Vernon, Illinois' progress in funding its obligation to provide pension benefits to its employees. RSI information follows the notes to the financial statements. The combining statements, which include nonmajor funds, for governmental funds are presented immediately following the RSI.

#### FINANCIAL ANALYSIS OF THE CITY AS A WHOLE

#### Net Position

The City's combined net position amounted to \$20.9 million. Of that total \$41.7 million is in the form of capital assets.

<sup>\*</sup>Beginning net position as restated April 30, 2018, due to the provisions of GASB 75 (See Note 13).

Most of the Governmental Activities' net position either are restricted as to the purposes they can be used for (e.g. grants) or are invested in capital assets (buildings, roads, bridges, and so on). The City has been able to pay the full economic costs of its services and programs in the current period. Many local governments are unable to accomplish this and, as a result, future generations will be required to pay for programs enjoyed in the current period. The City of Mt. Vernon, Illinois not only has sufficient funds to meet requirements for cash outlays in the next fiscal year, but it has the financial capacity to meet its long-term obligations in the years to come. The City's policy has been to make reasonable and continuous efforts to fund all long-term liabilities even in the face of a declining economy. The total net position of our Business-Type Activities amounted to \$16.4 million in fiscal year 18-19.

#### Changes in Net Position

The City's total revenues amounted to \$37.1 million in fiscal year 18-19 (See Table A-2). The largest revenue category is taxes, which amounted to \$23 million. In fiscal year 18-19, 72% of all taxes came from sales tax collections. \$13.7 million of total revenue was derived from program revenue, which consists of charges for services, federal and state grants, and other contributions. Total expenses amounted to \$31 million in fiscal year 18-19. The City's expenses cover a range of services, including public safety, public works, culture and recreation, and social and economic programs.

The City's total deferred outflows of resources of approximately \$7,490,556 increased approximately \$6,323,695 due to the deferred pension charges recognized and implementation of GASB Statement No. 75.

The City's total liabilities of approximately \$88,183,235 increased approximately \$5,894,943 mostly due to the implementation of GASB Statement No.75.

Governmental Activities: Net position for governmental activities increased by \$2,858,947 in the current year.

Business-Type Activities: Net position for business-type activities increased by \$3,139,948 in the current year.

Governmental Activities

Expenses and Program Revenues - Governmental Activities (Graph 1)

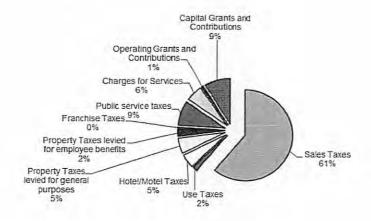

Graph 1 presents the cost of each of the City's seven largest programs - general government, police, fire, public works, engineering services, culture and recreation and community development, as well as each program's net cost (total cost less fees generated by the activities). The net cost shows the financial burden that was placed on the City's taxpayers by each of these functions.

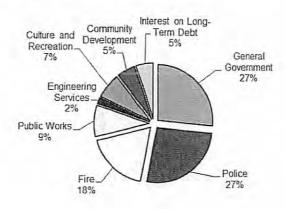

- · The cost of all governmental activities this year was \$22,067,960.
- However, the amount that our taxpayers paid for these activities through City revenues was \$17,974,355. Some of the cost was paid by:
  - Those who directly benefitted from the programs \$1,556,464 or
  - Other governments and organizations that subsidized certain programs with grants and contributions \$2,537,141.
- The City paid for the \$17,974,355 "public benefit" portion with \$19,222,137 in taxes and other revenues, such as interest earnings and unrestricted grants.
- General government required the third largest net amount of public funds after subtracting program revenue and grants and contributions. The total subsidy was \$3,594,369 in fiscal year 18-19.

- Public works required the fourth largest net amount of public funds after subtracting program revenue and grants and contributions. The total subsidy was \$1,622,112 in fiscal year 18-19.
- Police and fire required the first and second largest net amount of public funds after subtracting program revenue and grant contributions. The total subsidy for police was \$5,539,515, while fire was \$3,987,387.
- Administration and support services comprised 27% of total expenses in fiscal year 18-19.
- 66% of all governmental activities revenue came from sales tax revenue in fiscal year 18-19 (see Graph 2).
- 45% of all governmental activities expenses were for police (27%) and fire (18%), 27% went for general government, and 9% went for public works (see Graph 3).

Revenue by Source - Governmental Activities (Graph 2)

Expenses - Governmental Activities (Graph 3)

#### Business-Type Activities

Revenues of the City's business-type activities were \$9,633,630, and expenses were \$9,036,922 (Refer to Table A-2).

The Water and Sewer Fund were separated into two funds effective May 1, 2018. Previously, they were both included in the Public Utilities Fund.

The 2018-2019 Budget for the Water Fund projected an Operating Working Fund Balance (defined in the section "General Corporate Fund Budgetary Highlights" below) at April 30, 2019 of \$746,469.

The Water Fund ended the 2018-2019 fiscal year with an actual Operating Working Fund Balance of \$176,194 which is \$570,275 less than originally projected in the operating budget for that year. The major differences between the actual realized amount and the originally budgeted amount are:

- (1) The beginning Operating Working Fund Balance projected for the Water Fund in the budget for fiscal year 2018-2019 was overstated by \$42,444.
- (2) \$651,093 of Operating Working Fund Balance was transferred to the newly created Sewer Fund on May 1, 2018.
- (3) Operating revenues for fiscal year 2018-2019 came in approximately \$73,000 under budget.
- (4) Operating expenses for the fiscal year 2018-2019 came in approximately \$ under budget.

25% of the new 1% Home Rule Tax that was assessed starting on January 1, 2018 is being transferred into the Water Fund. The 2% increase in the water rates instituted on November 1, 2016 will continue and will increase an additional 2% each November 1 until stopped. These revenues have been committed by the City Council to finance future capital expenditures, infrastructure improvements and related debt service payments for water projects.

The 2018-2019 Budget for the Sewer Fund projected an Operating Working Fund Balance Deficit at April 30, 2019 of \$(7,752).

The Sewer Fund ended the 2018-2019 fiscal year with an actual Operating Working Fund Balance of \$659,284 which is \$667,036 more than originally projected in the operating budget for that year. The major differences between the actual realized amount and the originally budgeted amount are:

- (1) The beginning Operating Working Fund Balance projected for the Sewer Fund in the budget for fiscal year 2018-2019 was correctly stated.
- (2) \$651,093 of Operating Working Fund Balance was transferred from the Water Fund on May 1, 2018.
- (3) Operating revenues for fiscal year 2018-2019 came in approximately \$68,000 under budget.
- (4) Operating expenses for the fiscal year 2018-2019 came in approximately \$108,000 under budget.

25% of the new 1% Home Rule Tax that was assessed starting on January 1, 2018 is being transferred into the Sewer Fund. The 2% increase in the sewer rates instituted on November 1, 2016 will continue and will increase an additional 2% each November 1 until stopped. These revenues have been committed by the City Council to finance future capital expenditures, infrastructure improvements and related debt service payments for sewer projects.

The Sanitation Fund ended the 2018-2019 fiscal year with an actual Operating Working Fund Balance of \$154,965 when the 2018-2019 operating budget had projected \$161,382, which is \$6,417 less than originally projected. This decline was primarily due to the following:

- (1) The beginning Operating Working Fund Balance projected for the Sanitation Fund in the budget for fiscal year 2018-2019 was overstated by \$1,100.
- (2) Operating revenues for fiscal year 2018-2019 came in approximately \$2,500 under budget.
- (3) Operating expenses for the fiscal year 2018-2019 came in approximately \$3,000 over budget.

#### FINANCIAL ANAYLSIS OF THE CITY FUNDS

As the City completed its 2018-2019 fiscal year, its governmental funds reported a combined fund balance of \$11,193,153, a decrease of \$1,277,106, mostly due to the Quality of Life Fund and the General Corporate Capital Fund spending down their restricted assets. The decrease is accounted for in the next paragraph.

The General Corporate Fund's combined fund balance was \$4,466,735, an increase of \$502,705. The combined fund balance of the Quality of Life Fund decreased \$717,008 to \$2,921,421; the combined fund balance of the General Corporate Capital Fund decreased \$1,926,872 to \$1,715,152; the combined fund balance of the Motor Fuel Tax Fund increased \$165,279 to \$476,624; the combined fund balance of the Home Rule Tax increased \$534,135 to \$1,361,195; the combined fund balance of the Downtown TIF Fund increased \$81,678 to\$23,056; and the combined fund balances of the other governmental funds increased \$82,977 to \$228,970.

#### General Corporate Fund Budgetary Highlights

"Operating Working Fund Balance" is a term that the City uses regularly that consists of the "Unassigned Fund Balance", which is net of nonspendable, restricted, committed and assigned fund balance amounts. It represents liquid unrestricted net position that is available for future periods and is a number that we monitor closely. Our initial fiscal year 2018-2019 Budget for the General Corporate Fund, our largest operating fund of the City, and which includes the Aquatic Zoo Fund, predicted an Operating Working Fund Balance at April 30, 2019 of \$3,528,512. The accompanying financial statements show the General Corporate Fund as having an actual Operating Working Fund Balance, or Unassigned Fund Balance, of \$4,149,977 at April 30, 2019, an increase of \$621,465 over the original budgeted amount.

The major reasons for the difference between the budgeted amount and the actual amount are summarized as follows:

(1) The beginning Operating Working Fund Balance or "Unassigned Fund Balance" projected for General Corporate in the budget for fiscal year 2018-2019 was understated by \$9,388.

(2) Actual total revenues recognized for fiscal year 2018-2019 were \$943,681 higher than those originally budgeted, with sales taxes coming in at \$580,451 over the original budget (but should be reduced by \$57,353 state administration fee), use taxes coming in at \$58,268 over the original budget, hotel/motel taxes coming in at \$35,520 under the original budget, public service taxes coming in at \$200,449 over the original budget, unrestricted investment income coming in at \$71,856 over the original budget, and charges for services coming in at \$59,187 over the original budget.

(3) Actual total expenditures incurred for fiscal year 2018-2019 were \$704,868 lower than those originally budgeted, with General Government expenditures coming in at \$237,017 lower than originally

budgeted, Police Department expenditures coming in at \$309,657 under the original budget, Fire Department expenditures coming in at \$76,340 under the original budget, Public Works Department expenditures coming in at \$72,311 under the original budget, Engineering Department expenditures coming in at \$37,765 under the original budget and Culture and Recreation expenditures coming in at \$28,222 over.

(4) Actual "Net other financing (uses)" for fiscal year 2018-2019 were \$1,012,788 over that originally budgeted, with transfers to other funds coming in at \$1,000,000 over the original budget.

The Aquatic Zoo Fund is part of the General Corporate Fund discussed above and has an operating working fund balance of \$111,357 at April 30, 2019, a decrease of \$72,938 from the previous year.

We amended our General Corporate revenue budget upward by \$746,775 during the fiscal year 2018-2019, which included an increase in the sales taxes budget of \$549,000, an increase in use taxes budget of \$58,000, an increase in public service taxes budget of \$110,602, and an increase of \$24,949 in the budget for charges for services. We amended our General Corporate expenditure budget downward by \$271,425 during the fiscal year, including decreased budgeted expenditures for General Government of \$66,520. Budgeted expenditures for the Police Department were decreased by \$218,646, Fire Department budgeted expenditures were decreased by \$51,938, Public Works Department budgeted expenditures were decreased by \$29,809, and Culture and Recreation budgeted expenditures were increased by \$91,094.

The City maintains a conservative philosophy in its budgeting process.

Starting in the fall of 2017, we raised the price of liquor licenses and video gaming licenses. We also increased our property taxes 4.99% from the previous year for 2018-2019.

#### Other Governmental Funds Budgetary Highlights

On May 1, 2012 the General Corporate Capital Fund was set up. The 1% Food and Beverage Tax, the 2-cent per gallon Diesel Fuel Tax, the 1% Telecommunications Tax, grant income, interest income, miscellaneous income, bond and loan proceeds and transfers from other funds for capital expenditures are deposited into this fund. The funds accumulated from these revenues, after eligible disbursements, ended the fiscal year 2018-2019 with a positive balance of \$1,715,152 including receivables, that has been committed by the City Council to finance future capital expenditures, infrastructure improvements and related debt service payments. includes a \$1,000,000 transfer from the General Corporate Fund during the The 2010 bond proceeds have now been spent and the fiscal year 2018-2019. principal recorded in the General Corporate Capital Fund was 34.8455% of the total, based on actual amounts spent. The Water Fund has recorded 65.1545% of the total. The General Corporate Capital Fund's share of the 2012 general obligation bonds issued by the City in October 2012, was \$12,635,088, based on an estimate of capital and infrastructure projects in the Capital Projects Fund to be funded with those bond proceeds and the spend down of these funds has been accounted for in this fund. estimate was high and during the year ended April 30, 2019 the unspent amount of these bond proceeds, \$2,623,251, was transferred to the Quality of Life Fund and to the Water Fund where they have been or will be spent. The applicable portions of the debt service on these two bond issues is paid with restricted assets in this fund.

Also, as of May 1, 2012, the Quality of Life Fund was set up to record "quality of life and economic development" related expenditures that are funded by a portion of the general obligation bonds that were issued in October 2012, which totaled \$19,871,340 allocated to this fund; a ½ % Home Rule Sales Tax that was effective July 1, 2012; grant income; loans for capital expenditures; interest income; miscellaneous income and transfers from other funds for capital expenditures. We projected a total negative Working Fund balance of \$(1,448,693) at April 30, 2019 and the actual amount was \$2,921,421, mostly due to a transfer of \$2,418,279 of unspent 2012 bond proceeds from the General Corporate Capital Fund and 2012 Bond Proceeds not being spent down as fast as expected.

The Motor Fuel Tax Fund budget for 2018-2019 projected a working fund balance at April 30, 2019 of \$394,326. The actual working fund balance at April 30, 2019 was \$476,624, an increase of \$82,298, mostly due to expenses coming in lower than budgeted.

The Home Rule Sales Tax Fund, a special revenue fund, was created on January 1, 2018 to account for the revenue received from the new 1% home rule sales tax that was effective on that same date. The City Council restricted the use of this fund to expenses incurred for capital construction projects for the Water and Sewer Funds, capital equipment purchases for all City Departments, capital expenditures for road construction or road maintenance, early retirement of existing indebtedness and nuisance abatement expenditures including demolition of dangerous and dilapidated structures. The budget for 2018-2019 projected a total Working Fund Balance at April 30, 2019 of \$1,206,267. The actual Working Fund Balance at April 30, 2019 was \$1,361,195, an increase of \$154,928, mostly due to revenues coming in higher than budgeted. 25% of the net revenues in this fund are tentatively earmarked for Water Fund projects, 25% for Sewer Fund Projects, and the other 50% are tentatively earmarked for the other restricted purposes mentioned above.

#### Internal Service Fund Budgetary Highlights

The City's self-insured Health Insurance Fund budgeted a 0% increase in its premiums charged to all the City's applicable funds effective January 1, 2019, since we had substantial increases as of January 1, 2016 and January 1, 2017 attributable to abnormally high amounts of claims in 2015 and 2016. Our claims had decreased in 2017 and we had a 0% increase as of January 1, 2018. Our claims continued to be low in 2018 and we did in fact have a 0% increase on January 1, 2019 as budgeted. The Health Insurance Fund budget for 2018-2019 projected a Working Fund Balance at April 30, 2019 of \$1,188,039. The actual Working Fund Balance at April 30, 2019 was \$1,444,002, an increase of \$255,963, due to the beginning fund balance being under stated by \$175,665 and revenues coming in higher than expected by \$101,738.

#### Long-Term Debt:

At year-end, the City had \$33,514,999 in bonds outstanding - a decrease of \$1,885,000 over the prior year. Other long-term debt outstanding at year end was \$4,451,416, an increase of \$2,241,816. More detailed information about the City's long-term liabilities is presented in Note 5 to the financial statements.

#### NEXT YEAR'S BUDGET HIGHLIGHTS

We prepare a budget for all the City funds except for the Police and Firefighters' Pension Funds. The budget for 2019-2020 includes total Citywide budgeted expenditures of \$51,561,304.

The City projects an Operating Working Fund Balance in the General Corporate Fund of \$3,770,078 at April 30, 2020. Total operating expenditures in the General Corporate Fund are projected at \$14,650,388 for the fiscal year ending April 30, 2020 with a budgeted deficit in operations of \$(58,958). We project to have an Operating Working Fund Balance at April 30, 2020 which is equal to 3.1 months of operating expenditures. The Aquatic Zoo Fund is included in the General Corporate Fund.

We anticipated a decrease of 2% in our 1% State Sales Tax and our 1% Home Rule Sales Tax over 2018-2019 revenue except for an additional partial year amount planned from the new Menard's store which opened July 3, 2018. These revenues were up for 2018-2019 from the previous year and we estimate that they will decrease for 2019-2020.

2019-2020 will be the second full year since we raised the price of liquor licenses and video gaming licenses. We increased our property taxes 2.17% from the previous year.

All City departments were required to have only a 1% increase in their 2019-2020 operating budgets, exclusive of payroll, from their 2018-2019 operating budgets.

During 2018-2019, we re-hired the last three of the seven previously laid-off full-time laborer positions. As far as part-time labor positions, we had only budgeted for four non-union positions for nuisance enforcement. For 2019-2020, we have budgeted for those four positions and budgeted for two part-time union positions in the Public Works department and two in the Parks department.

General Corporate's repayment for labor and equipment from the Motor Fuel Tax Fund is not budgeted for 2019-2020 after not being paid for 2017-2018 and 2018-2019. We hope to be able to continue this "no charge" in the future.

Our most recent six union contracts started on May 1, 2018 with all of them agreeing to a four-year contract with a 1% longevity raise and an additional 1.75% raise each year. We have assumed this same raise for our non-union employees.

The City will manage the Aquatic Zoo for the 2019 season with internal staff. This fund incurred an abnormal number of repairs for 2018-2019 and is expected to continue that trend for 2019-2020. 2019-2020 will be the sixth season of operations.

The City has ten other Governmental Funds whose revenues are earmarked for specific purposes and are not to be used for general operating purposes. These funds are called Special Revenue Funds.

Included in this class of funds is the Quality of Life Fund. We are projecting a total Working Fund Balance at April 30, 2020 of \$665,360 in this fund, which includes a zero restricted Working Fund Balance for the 2012 Bonds since those funds are all projected to be spent. We transferred \$2,418,279 during 2018-2019 from the General Corporate Capital Projects Fund unspent 2012 bond funds to this fund to provide money for the remaining projects to be spent out of this fund.

The General Corporate Capital Projects Fund is another special revenue fund and we are proposing to spend \$3.9 million for capital and infrastructure expenditures and related debt service expenses during 2019-2020. The General Corporate Fund transferred \$1,000,000 to this fund during 2018-2019 for various capital and infrastructure expenditures in 2019-2020. During 2018-2019, we transferred \$2,623,251 of unspent 2012 bond proceeds to the Quality of Life and Water Funds and no longer have any 2012 bond funds remaining. We are projecting a total Working Fund Balance at April 30, 2020 of \$6,506 in this fund,

The Home Rule Sales Tax Fund, another special revenue fund, is projected to have a total Working Fund balance of \$118,864 at April 30, 2020. Future balances in the fund may be used for early retirement of a portion of the 2012 bonds that have a call date of December 15, 2020.

The total Working Fund Balance of the ten Special Revenue Funds at April 30, 2020 is projected to be \$1,215,838. Three TIF (Tax Increment Financing) funds are included in these funds.

The City has four Proprietary Funds whose operating expenses are intended to be funded by their operating revenues.

The Water Fund is projected to have an operating surplus of \$405,835 for 2019-2020, which will be totally used and then some to subsidize the Sewer Fund operations, a Working Fund Balance for operations at April 30, 2020 of \$771,916 (which has since been adjusted down to \$120,823 due to the separation transfer to the new Sewer Fund) and total expenditures for operations of \$3,905,209. On May 1, 2019, there was no increase in water rates for operations. The Water Fund is proposing \$4.615 million of capital expenses, infrastructure improvements and related debt service expenses for fiscal year 2019-2020.

The Sewer Fund is projected to have an operating deficit of \$(438,633) for 2019-2020, which will be completely subsidized by a transfer from the Water Fund's operations, a Working Fund Balance for operations at April 30, 2020 of \$785 (which has since been adjusted upward to \$651,878 due to the separation transfer from the Water Fund) and total expenditures for operations of \$3,313,441. On May 1, 2019, there was no increase in sewer rates for operations. The Sewer Fund is proposing \$3.861 million of capital expenses, infrastructure improvements and related debt service expenses for fiscal year 2019-2020.

The City Council previously restricted revenue from 3% water and sewer rate increases on May 1, 2009, November 1, 2009, November 1, 2010, November 1, 2011 and November 1, 2012 for capital, infrastructure improvements and related debt service expenses, which are being accounted for in the Water Fund. They also restricted revenues from a 2% water and sewer rate increase on November 1, 2016 and each November 1st thereafter, until suspended, for the same purposes, which are being accounted for in the Water and Sewer Funds. Approximately 10% of the 2012 General Obligation Bonds have been allocated to the Water and Sewer Funds and are restricted there for capital and infrastructure improvements. These funds are being accounted for in the Water Fund. The City transferred \$204,972 during 2018-2019 from the General Corporate Capital Projects Fund unspent 2012 bond funds to the Water Fund to provide money for the projects spent out of this fund.

The Sanitation Fund is projecting a Working Fund Balance of \$183,386 at April 30, 2020. The garbage rates were not increased on May 1, 2019 and are still at \$19.00 per month.

The City's self-insured Health Insurance Fund, which is considered an "Internal Service Fund", is projected to have a Working Fund Balance of \$1,482,250 at April 30, 2020. We are estimating no increase in our rates effective January 1, 2020. Effective May 1, 2016 we transferred our health insurance coverage for 56 retirees to Medicare Plan F coverage and have since transferred additional retirees to this plan.

#### Noncompliance with the City's Financial Policies

On October 1, 2012, the City Council passed as an ordinance the "City of Mt. Vernon, IL Financial Policies", which, among other things, implemented a policy as to the amount of Operating Working Fund Balance that each fund should maintain. At April 30, 2019 the City is following that policy in all but the following funds:

|                                 | Operating Working | Amount    |           |
|---------------------------------|-------------------|-----------|-----------|
|                                 | Fund Balance      | Required  | Shortage  |
| Downtown TIF                    | \$ 23,056         | \$161,667 | \$138,611 |
| Special Service Area Number One | \$ 7,668          | \$ 7,841  | \$ 173    |
| IPC TIF                         | \$ (8,606)        | \$ -0-    | \$ 8,606  |
| Public Utilities Fund           | \$176,194         | \$325,434 | \$149,240 |

Also, the audit is required to be approved at the second City Council meeting in September and that deadline was not reached.

| The internal service fund is used by management to charge the costs of operating the self-insured health care plan (Health Insurance Fund) to the individual funds. The net revenue of the Health Insurance Fund is reported with the governmental activities, in the government-wide statement of activities (net of the amount allocated to business-type activities, if any). Internal service fund balances not included in other reconciling items: |                       |                     |                                 |                     |                     |                        |                                |                                |

Police Pension - to account for the accumulation of resources to be used for retirement annuity payments to participants at appropriate amounts and times in the future.

Firefighters' Pension - to account for the accumulation of resources to be used for retirement annuity payments to participants at appropriate amounts and times in the future.

The accompanying notes are an integral part of the financial statements.

## CITY OF MT. VERNON, ILLINOIS NOTES TO BASIC FINANCIAL STATEMENTS April 30, 2019

### Note 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The City of Mt. Vernon, Illinois (the "City"), was founded in 1819, and has a population of 15,277. The City operates under a Mayor-Council-Manager form of government. The City is an Illinois municipal corporation. The Mayor is elected at large for a four-year term. The City council is comprised of four members elected for four-year terms. The financial statements of the City are prepared in accordance with Generally Accepted Accounting Principles in the United States of America ("GAAP") as applied to governmental units. The Governmental Accounting Standards Board ("GASB") is the standard-setting body for governmental accounting and financial reporting.

## A. Reporting Entity

In evaluating the City as a reporting entity as defined by GASB Statement No. 39, Determining Whether Certain Organizations are Component Units - an Amendment of GASB Statement No. 14, management has addressed all potential component units (traditionally separate reporting entities) for which the City may be financially accountable and, as such, should be included within the City's financial statements. The City (the primary government) is financially accountable if it appoints a voting majority of the organization's governing board and (1) it is able to impose its will on the organization or (2) there is a potential for the organization to provide specific financial burden on the Additionally, the primary government is required to consider other organizations for which the nature and significance of their relationship with the primary government are such that exclusion would cause the reporting entity's financial statements to be misleading or incomplete. Management has concluded that there are no component units of the City.

## B. Joint Ventures and Related Organizations

Joint Ventures - A joint venture is a legal entity or other organization that results from a contractual agreement and that is owned, operated or governed by two or more participants as a separate and specific activity subject to joint control in which the participants retain (a) an ongoing financial interest or (b) an on-going financial responsibility. Management has concluded that there are no joint ventures.

Related Organizations - The City's officials are also responsible for appointing the members of the boards of other organizations, but the City's accountability for these organizations do not extend beyond making the appointments. The following organizations are related organizations that are excluded from the reporting entity: The City Housing Authority of Mt. Vernon provides public housing to qualified residents. The City Council appoints all members of the Board of Commissioners of the Authority. The Authority is not a component unit nor a joint venture of the City because it is autonomous in its operations and because the City has no financial accountability over the Authority.

The Illinois Municipal Retirement Fund is a multipleemployer public employee retirement system serving as an investment and administrative agent for participating units of government. The City is a participating unit of local government as more fully described in Note 6. State statutes determine which units of local government in Illinois are required to participate in the I.M.R.F. system and those that have the choice of participating. The Illinois Municipal Retirement Fund is not a component unit of the City because it is autonomous in its operations and because the City has no financial accountability over the Fund.

The Foreign Fire Insurance Board of the City of Mt. Vernon, Illinois was created on October 13, 2004, by the members of the City of Mt. Vernon Fire Department. The board consists of seven members elected by the members of the Fire Department. The purpose of the board is to manage and determine the use and disposition of money received from Foreign Fire Insurance tax receipts. The board is not considered to be a component unit nor a joint venture because it is autonomous in its operations, designation of management, and an ongoing financial interest is not retained by the City. See Note 3 for additional information regarding the Foreign Fire Insurance Board of the City of Mt. Vernon, Illinois.

The Board of Commissioners of the Mt. Vernon Airport Authority consists of five members of which three are appointed by the City Council and two are appointed by the Jefferson County Board. The Authority is neither a component unit nor a joint venture because it is autonomous in its operations, designation of management, and accountability for fiscal matters and an ongoing financial interest is not retained by either the City or the County.

The Jefferson County Development Corporation (JCDC) is a not for profit organization whose mission statement is "to lead, coordinate, develop, and implement strategies to enhance economic development through business retention, expansion, and attraction". It started official operation on May 1, 2006. There are twenty-three Board members, fifteen from industry and eight from the public or not for profit The Mayor of the City automatically holds one of the board seats, but there are no board members appointed by the City Council. The City has in the past funded between \$100,000 and \$150,000 in financial support per year for nine years, in addition to in-kind support by providing office space in its Municipal West building. The City has budgeted funding of \$100,000 to the JCDC for the year ended April 30, 2020, as well as providing office space. The JCDC is neither a component unit nor a joint venture of the City because it is autonomous in its operations, designation of management, and accountability for fiscal matters and an ongoing financial interest is not retained by the City.

Jointly Governed Organizations - The following organization is a jointly governed organization that is excluded from the City's reporting entity. This organization is not a joint venture because the City does not retain an ongoing financial interest or an ongoing financial responsibility. The City, in conjunction with the County and other municipalities, has created the following organization:

During the year ended April 30, 1991, the City and Jefferson County Board entered into an Intergovernmental Agreement and, pursuant to the Emergency Telephone System Act, established the Jefferson County Emergency Telephone System Board. The purpose of the Board is to oversee the implementation and the fiscal and operational responsibilities for an emergency telephone system commonly known as "Enhanced 9-1-1". The Agreement specified that the Mayor of the City of Mt. Vernon, Illinois and the Chairman of the Jefferson County Board shall each appoint three members to serve initial terms of one, two, and three years, respectively, and thereafter, to serve three-year terms. Another board member shall be appointed annually by the City of Mt. Vernon, Illinois during even-numbered years and by the Chairman of the Jefferson County Board during odd-numbered years. The City has no ongoing financial interest or ongoing financial responsibility but has joint control over the Board, which is considered a jointly governed organization. The City provides insurance coverage for the "Enhanced 9-1-1" equipment located within the City's police station. There were no related-party transactions between the City and the Board during the year ended April 30, 2019.

## C. Basic Financial Statements - GASB Statement No. 34

The basic financial statements include both governmentwide (based on the City as a whole) and fund financial statements. While the previous model emphasized fund types (the total of all funds of a particular type), the new reporting model focuses on either the City as a whole or major individual funds (within the fund financial statements). Both the government-wide and fund financial statements categorize activities as either governmental activities or business-type activities. In the government-wide Statement of Net Position, both the governmental and business-type activities columns (a) are presented on a consolidated basis by column, and (b) are reflected, on a full accrual, economic resource basis, which incorporates long-term assets and receivables as well as long-term debt and obligations. The government-wide Statement of Activities reflects both the gross and net cost per functional category (public safety, public works, etc.) which are otherwise being supported by general government revenues (property, sales and use taxes, certain intergovernmental revenues, fines, permits and charges, The Statement of Activities reduces gross expenses (including depreciation) by related program revenues, operating and capital grants. The program revenues must be directly associated with the function or a business-type activity. Program revenues include revenues from fines and forfeitures, licenses and permits fees, special assessment taxes, and charges for services. The operating grants include operating-specific and discretionary (either operating or capital) grants while the capital grants column reflects capital-specific grants. The net costs (by function or business-type activity) are normally covered by general revenue (property, sales or gas taxes, intergovernmental revenues, interest income, etc.). Historically, the previous model did not summarize or present net cost by function or activity. This government-wide focus is more on the sustainability of the City as an entity and the change in aggregate financial position resulting from the activities of the fiscal period. The fund financial statements are, in substance, very similar to the financial statements presented in the previous model. Emphasis here is on the major funds in either the governmental or business-type categories. Nonmajor funds (by category) or fund type are summarized into a single column. Unless an internal service fund is combined with the business-type activities (deemed to be an infrequent event), totals on the proprietary fund statements should directly reconcile to the business-type activity column presented in the government-wide statements. governmental funds major fund statements in the fund financial statements are presented on a current financial resource and modified accrual basis of accounting. This is the manner in which these funds are normally budgeted. presentation is deemed most appropriate to (a) demonstrate legal and covenant compliance, (b) demonstrate the source and use of liquid resources, and (c) demonstrate how the City's

actual experience conforms to the budget or fiscal plan. Since the governmental fund statements are presented on a different measurement focus and basis of accounting than the government-wide statements' governmental column, a reconciliation is presented either on the fund statement or on the page following each statement which briefly explains the adjustments necessary to transform the fund based financial statements into the governmental column of the government-wide presentation. Internal service funds of a government (which traditionally provide services primarily to other funds of the government) are presented in the summary form as part of the proprietary fund financial statements (when applicable). Since the principal users of the internal services are the City's governmental activities, financial statements of internal service funds are consolidated into the governmental column when presented at the government-wide To the extent possible, the costs of these services are reflected in the appropriate functional activity (public safety, public works, etc.). The City's health insurance fund is an internal service fund. The City's fiduciary funds (which have been redefined and narrowed in scope) are presented in the fund financial statements by type as applicable (pension, private purpose and agency). Since by definition these assets are being held for the benefit of a third party (other local governments, private parties, pension, participants, etc.) and cannot be used to address activities or obligations of the government, these funds are not incorporated into the government-wide statements. focus of the current model is on the City as a whole and the fund financial statements including the major individual funds of the governmental and business-type categories, as well as the fiduciary funds, (by category) and the component units. Each presentation provides valuable information that can be analyzed and compared (between years and between governments) to enhance the usefulness of the information.

## D. Basis of Presentation

The financial transactions of the City are recorded in individual funds. Each fund is accounted for by providing a separate set of self-balancing accounts that comprise its assets, liabilities, reserves, fund equity, revenues and expenditures/expenses. The various funds are reported by generic classification within the financial statements. new model as defined in GASB Statement No. 34 sets forth minimum criteria (percentage of the assets, liabilities, revenues or expenditures/expenses of either fund category or the governmental and enterprise combined) for the determination of major funds. The nonmajor funds are combined in a single column in the fund financial statements. Proprietary funds distinguish operating revenues and expenses from non-operating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing activity. The principal operating revenues for the public utilities are charged to customers for sales and services. Operating expenses include cost of sales and service, administrative expenses, and depreciation on capital All revenues and expenses not meeting this definition are reported as non-operating revenues and expenses.

## 1. Major Funds

General fund is the general operating fund of the City. It is used to account for all financial resources except those required to be accounted for in another fund.

The quality of life fund accounts for "quality of life and economic development" related expenditures that are funded by general obligation bonds and a ½% home rule sales tax.

The general corporate capital fund accounts for capital expenditures, infrastructure improvements and related debt service expenditures of the general corporate fund that are funded by restricted sources of revenue, including general obligation bonds.

Motor fuel tax accounts for State motor fuel tax allotments.

Sanitation fund accounts for collecting and disposing of refuse.

Home Rule sales tax fund accounts for revenue collected on the January 1, 2018 1% Home Rule sales tax as well as related expenditures.

Downtown TIF (Tax Increment Finance) to account for the City's activities related to TIF funds received from the Downtown district.

Water fund accounts for the operations and maintenance of providing waterworks utility services to the residents of the City and surrounding areas and to outlying villages.

Sewer fund accounts for the operations and maintenance of providing sanitary sewerage utility services to the residents of the City.

Health insurance fund accounts for the risk management function of the City's health care claims paid under the City's self-insurance program. These costs are allocated to the related funds.

### 2. Internal Service Funds

Internal service funds account for the operations that provide services to other departments or agencies of the governmental or to other governments on a cost-reimbursement basis. The internal service funds are presented as one column on the proprietary fund financial statements. Currently the City has one internal service fund that accounts the self insured health care costs related to employee benefits. The health insurance fund accounts for the risk management function of the City's health care claims paid under the City's self-insurance program. These costs are allocated to the related funds.

## 3. Fiduciary Funds

Fiduciary funds are used to report assets held in a trustee or agency capacity for others and, therefore, are not available to support City programs. The reporting focus is upon net position and changes in net position and employs accounting principles similar to proprietary funds.

Pension funds are used to report resources that are held in trust for the members and beneficiaries of defined benefit plans and other post employment benefit plans.

Agency funds are used to report resources held by the City in a purely custodial capacity (assets equal liabilities). Agency funds typically involve the receipt, temporary investment, and remittance of fiduciary resources to individuals, private organizations or other governments.

## 4. Noncurrent Governmental Assets/Liabilities

GASB Statement No. 34 eliminates the presentation of Account Groups, but provides for these records to be maintained and incorporates the information into the governmental column in the Government-Wide Statement of Net Position.

## E. Basis of Accounting

Basis of accounting refers to the point at which revenues or expenditures/expenses are recognized in the accounts and reported in the financial statements. It relates to the timing of the measurements made, regardless of the measurement focus applied. The Government-Wide Financial Statements, the Proprietary, and Fiduciary Fund Financial Statements are presented on an "economic resources" measurement focus and the accrual basis of accounting. Accordingly, all of the City's assets, deferred outflows of resources, liabilities, and deferred inflows of resources, including capital assets and long-term liabilities, are included in the accompanying Statement of Net Position. The governmental funds in the Fund Financial Statements are presented on a modified accrual basis.

Accrual - Revenues are recognized when earned and expenses are recognized when incurred.

Modified Accrual - All governmental funds are accounted for using the modified accrual basis of accounting. Under the modified accrual basis of accounting, revenues are recorded when susceptible to accrual; i.e., both measureable and available. "Measurable" means the amount of the transaction can be determined. "Available" means collectible within the current period or soon enough thereafter to be used to pay liabilities of the current period.

The City defined the length of time used for "available" for purposes of revenue recognition in the governmental fund financial statements to be 60 days.

Expenditures are generally recognized under the modified accrual basis of accounting when the related liability is incurred. The exception to this general rule is that principal and interest on general obligation long-term debt, if any, is recognized when due.

In applying the "susceptible to accrual" concept to intergovernmental revenues pursuant to GASB Statement No. 33, the provider should recognize liabilities and expenses and the recipient should recognize receivables and revenue when the applicable eligibility requirements, including time requirements, are met. Resources transmitted before the eligibility requirements are met should, under most circumstances, be reported as advances by the provider and as deferred revenue by the recipient.

## F. Budget Policy and Budgetary Data

Budget Policy - The City establishes control over the operations of its funds through the use of budgets. The budgets of the governmental funds are prepared on the modified accrual basis of accounting. Budgeted expenditures represent the legal limitation on actual expenditures. The level of classification at which expenditures may not legally exceed budgeted amounts is at the individual line item (object classification) within a fund. Instances of expenditures exceeding budgeted amounts are detailed in Note 8. Unspent budgeted amounts lapse at the end of the fiscal year for which they were made. Encumbrances are not used for unperformed contracts for goods or services. The City follows these procedures in establishing its budgets:

- 1. In January the Department heads begin to submit their budget requests to the City Manager for the upcoming fiscal year.
- 2. The City Manager and the Director of Finance meet with the Department heads and revise the budget requests as necessary.
- 3. In March, or as soon after as possible, the City Manager presents a tentative budget to the City Council.
- 4. The City Council meets with the City Manager, Director of Finance, and the Department heads and revises the tentative budget as necessary.
- 5. The budget is adopted by the City Council by April 30 through passage of an ordinance.

- 6. The budget may be amended within a subclass of a fund (either revenue sources or expenditure subclass classifications) with the approval of the City Manager and the Director of Finance. Any amendments that change the total revenues or expenditures within a subclass of a fund must be approved by a two-thirds vote of the City Council.
- 7. Formal budgetary integration is employed as a management control technique during the year for all funds with a budget.

Budgetary Data - During the year, several supplemental appropriations were necessary. All budget amounts presented in the accompanying supplementary information reflect the original budget and the amended budget (which have been adjusted for legally authorized revisions to the annual budgets during the year). Appropriations, except remaining project appropriations, encumbrances, and unexpended grant appropriations, lapse at the end of each fiscal year.

## G. Assets, Liabilities, Deferred Outflows/Inflows of Resources, and Net Position

1. Cash and Cash Equivalents - In order to maintain internal control, cash balances are pooled from most funds of the City. The pool is deposited in an interest-bearing account that is subject to withdrawal. Earnings from this account are allocated monthly to each fund based on the average of the week ending balances during the month.

For purposes of the statement of cash flows, the City considers all highly liquid investments (including restricted assets) with a maturity of three months or less when purchased to be cash equivalents. The City reports cash flows from operating activities using the indirect method. In accordance with Statement No. 9 of the Governmental Accounting Standards Board regarding reporting cash flows, a statement of cash flows has not been presented for the pension trust funds. Refer to Note 3 for the collateralization of the City's cash.

2. Investments - Investments are stated at fair value in the statement of net position. A net increase in fair value of investments is recognized and reported as investment gain in the financial statements for the year ended. The amount of the increase for the year ending April 30, 2019, is as follows:

Government activities \$-0-Business-type activities -0-Net increase in fair value -0-

Refer to Note 3 for the collateralization of the City's investments.

- 3. Accounts Receivable and Taxes Receivable Sales, taxpayer-assessed income, motor fuel, and similar taxes collected by other governments for the City are recorded as receivables when in the possession of intermediary collecting governments. Use, occupancy, and franchise taxes collected by the City are recorded as receivables when due and collectible. Property taxes are recorded as receivables, net of an allowance for uncollectible taxes, when they are levied. Unbilled services are recorded as receivables. The allowances for doubtful accounts for the Governmental Fund Types and Proprietary Fund Types are \$-0- and \$109,000, respectively.
- 4. Inventories Inventory items in the modified accrual basis funds are expended when purchased. Inventories in the accrual basis funds are valued at the lower of cost or market on a "first-in, first-out" flow assumption. Raw water in the City's reservoirs is not included in inventory in the public utilities fund. Appropriate allowances are recorded for obsolete and surplus items.
- 5. Prepaid Expenses Prepaid balances are for payments made by the City in the current year to provide services occurring in the subsequent fiscal year.
- 6. Internal Balances Amounts reported in the fund financial statements as interfund receivables and payables are eliminated in the entity-wide governmental and business-type activities columns of the statement of net position, except for the net residual amounts due between governmental and business-type activities, which are presented as internal balances. Within the governmental fund financial statements, such amounts are equally offset by a fund balance reserve that indicates they do not constitute available spendable resources.

Due To/Due From - Amounts, which are due within one year, owed to one fund by another are reported as due to or due from other funds.

7. Capital Assets - The City's property, plant, equipment, and infrastructure with useful lives of more than one year are stated at historical cost or estimated historical cost. Contributed assets are recorded at fair market value as of the date donated. Additions, improvements and other capital outlays that significantly extend the useful life of an asset are capitalized with a cost of \$5,000 or more, except for infrastructure assets which are capitalized beginning with a cost of \$100,000. Other costs incurred for repairs and maintenance are expensed as incurred. Depreciation on capital assets is calculated on the straight-line basis over the following estimated useful lives:

## Capitalization:

| _                     | Useful Life  |
|-----------------------|--------------|
| Buildings             | 20-50 years  |
| Land improvements     | 20-30 years  |
| Equipment             | 2-20 years   |
| Water and sewer lines | 33-100 years |
| Streets               | 25 years     |
| Bridges               | 50 years     |

Interest is capitalized on assets, other than infrastructure assets, acquired with tax-exempt debt. The amount of interest capitalized is the net interest expense incurred (interest expense less interest income) from the date of the borrowing until completion of the project.

When capital assets are disposed, the cost and applicable accumulated depreciation are removed from the respective accounts, and the resulting gain or loss is recorded in operations.

Upon implementation of GASB Statement No. 34, the City is required to record and depreciate infrastructure assets for governmental funds. Infrastructure assets placed into service since fiscal year ending April 30, 1981, above the required threshold amount, have been reported at their estimated historical cost using the deflated replacement cost approach.

Refer to Note 4 for the composition of the City's property and equipment.

8. Restricted Assets - Restricted assets are assets which are restricted in use by legal or contractual requirements.

Refer to Note 3 for the composition of the City's restricted assets.

Bond Discounts, Premiums, and Issuance Costs - In the governmental funds, bond discounts, premiums, and issuance costs are treated as period costs/revenues in the year of issuance. Bond issuance costs are shown as an "other financing use". In proprietary funds, issuance costs are treated as period costs/revenues in the year of issuance. Bond discounts are presented as a reduction of the face amount of the revenue bonds payable. premiums are presented on the balance sheet as a liability. The premiums are accreted over the life of the bonds using the effective interest rate method. As part of the reconciliation and presentation at the government-wide level these type of costs (when present) in the governmental funds are required to be adjusted and reflected similarly to proprietary funds.

10. Deferred Outflows and Inflows of Resources - As defined by GASB Concept Statement No. 4, "Elements of Financial Statements", deferred outflows of resources and deferred inflows of resources are the consumption of net position by the government that are applicable to a future reporting period and an acquisition of net position by the government that are applicable to a future reporting period, respectively.

In addition to assets, the Statement of Net Position and the Balance Sheet will sometimes report a separate section for deferred outflows of resources. separate financial statement element, deferred outflows of resources, represents a consumption of net position that applies to a future period(s) and so will not be recognized as an outflow of resources (expense/ expenditure) until then. The City currently has one type of deferred outflows of resources: (1) The City reports deferred pension charges in its Statements of Net Position in connection with its participation in the Illinois Municipal Retirement Fund and its Police and Firefighters' Pension Funds. These deferred pension charges are either (a) recognized in the subsequent period as a reduction of the net pension liability (which includes pension contributions made after the measurement date) or (b) amortized in a systematic and rational method as pension expense in future periods in accordance with GAAP.

In addition to liabilities, the Statement of Net Position and the Balance Sheet will sometimes report a separate section for deferred inflows of resources. This separate financial statement element, deferred inflows of resources, represents an acquisition of net position that applies to a future period(s) and so will not be recognized as an inflow of resources (revenue) until that time. The City currently has one type of deferred inflow of resources. The City reports deferred revenue; it is deferred and recognized as an inflow of resources in the period the amounts become available.

### 11. Fund Equity

The City implemented GASB Statement No. 54, Fund Balance Reporting and Governmental Fund Type Definitions during the fiscal year ended April 30, 2010. This statement provides more clearly defined fund balance categories to make the nature and extent of the constraints placed on a government's fund balances more transparent. The following classifications describe the relative strength of the spending constraints:

 Nonspendable fund balance - amounts that are not in spendable form (such as inventory) or are required to be maintained intact.

- Restricted fund balance amounts constrained to specific purposes by their providers (such as grantors, bondholders, and higher levels of government), through constitutional provisions, or by enabling legislation.
- Committed fund balance amounts constrained to specific purposes by the City itself, using its highest level of decision-making authority (i.e., City Council). To be reported as committed, amounts cannot be used for any other purpose unless the City takes the same highest level action to remove or change the constraint.
- Assigned fund balance amounts the City intends to use for a specific purpose. Intent can be expressed by the City Council or by an official or body to which the City Council delegates the authority.
- Unassigned fund balance amounts that are available for any purpose. Positive amounts are reported only in the general fund.

Beginning fund balances for the City's governmental funds were restated to reflect the above classifications at the time of implementation.

City Council establishes (and modifies or rescinds) fund balance commitments by passage of an ordinance or resolution. This is typically done through adoption and amendment of the budget. A fund balance commitment is further indicated in the budget document as a designation or commitment of the fund (such as for special incentives). Assigned fund balance is established by City Council through adoption or amendment of the budget as intended for specific purpose (such as the purchase of fixed assets, construction, debt service, or for other purposes).

The City would typically use restricted fund balances first, followed by committed resources, and then assigned resources, as appropriate opportunities arise, but reserves the right to selectively spend unassigned resources first to defer the use of these other classified funds.

Capital contributed to the proprietary funds to finance the acquisition of property and equipment has been credited to contributed equity within the municipal equity section of the balance sheet. These amounts are systematically amortized over the useful life of the assets acquired. The depreciation attributable to these assets is charged against net income but is closed against contributed equity instead of retained earnings.

Contributions to the proprietary funds from the governmental funds for the purchase of property and equipment are shown as residual equity transfers in the governmental funds and as increases in contributed equity in the proprietary funds.

Refer to Note 3 for the composition of the City's municipal equity classifications.

## H. Revenues, Expenses, and Expenditures

Substantially all governmental fund revenues are accrued. Property taxes are billed and collected several months after the taxes are levied. Expenditures are recognized when the related fund liability is incurred except for the following which are permitted by generally accepted accounting principles:

- Sales, Hotel, and Other Tax Revenue The City administers the collection of its occupancy tax on hotels and motels, its franchise taxes, and its licenses and permits. The Illinois Municipal League administers the collection of the tax on fire insurance premiums paid to out-of-state insurance companies. Various officials of the City are members of the Illinois Municipal League. No direct relationship exists between the City and the The Illinois Department of Transportation administers the collection of motor fuel taxes. direct relationship exists between the City and the Illinois Department of Transportation. Sales tax and all other tax collections of the City are administered by the Illinois Department of Revenue. No direct relationship exists between the City and the Illinois Department of Revenue.
- 2. Property Tax Revenue Property taxes and court fines and fees collections are administered by Jefferson County. The City's corporate limits are totally contained within Jefferson County. No direct relationship exists between the City and the County other than as disclosed in Note 2. Property taxes are levied during a calendar year and attach as an enforceable lien on property as of December 31. These are payable in two installments during the following summer and fall on due dates to be set by the County at which time collection is made. Property tax revenue is recorded as revenue and taxes receivable on the levy date.
- 3. Grant Revenue The City, a recipient of grant revenues, recognizes revenues (net of estimated uncollectible amounts, if any), when all applicable eligibility requirements, including time requirements, are met.

Resources transmitted to the City before the eligibility requirements are met are reported as deferred revenues. Some grants and contributions consist of capital assets

or resources that are restricted for capital purposes to purchase, construct, or renovate capital assets
associated with a specific program. These are reported
separately from grants and contributions that may be used
either for operating expenses or for capital expenditures
of the program at the discretion of the City.

- 4. Investment Income Investment income from pooled cash and investments is allocated monthly based on the percentage of a fund's average daily equity in pooled cash and investments to the total average daily pooled equity in pooled cash and investments. Investment earnings from the debt service fund, if any, are reported as investment earnings of the general fund.
- 5. Debt General obligation long-term debt principal and interest are reported only when due.
- 6. Inventory Inventory costs are reported in the period when inventory items are consumed, rather than in the period purchased.
- 7. Interfund Transactions Interfund transactions are loans, services provided, reimbursements or transfers. Loans are reported as receivables and payables as appropriate and are subject to elimination upon consolidation. Services, deemed to be reasonably equivalent in value, are treated as revenues and expenditures/expenses. Reimbursements are when one fund incurs a cost, charges the appropriate benefitting fund and reduces its related cost as a reimbursement. All other interfund transactions are presented as transfers. Transfers within governmental activities or within business-type activities are eliminated upon consolidation in the government-wide statements.
- 8. Compensated Absences Compensated employee vacation pay is accrued when earned in both governmental and proprietary funds. Accumulated sick pay is accrued in the governmental and proprietary funds when vested. Accumulated unvested sick pay cannot be reasonably estimated by the City as of April 30, 2019.

Employees are granted two weeks vacation after one year of service, three weeks vacation after seven years of service, and four weeks vacation after twelve years of service. Vacations are granted on January 1 of each year and shall be used on or before December 31 of the same year. Employees with less than one year of service as of January 1 are granted one vacation day for each full month of service with a maximum of two weeks. Vacations may not be accumulated and any vacations not used during the year are forfeited. Upon termination, employees are paid for any unused accumulated vacation as of their date of termination.

Employees are granted one sick day for each full month of service up to a maximum of 125 days. Additionally, employees can earn one (1) day above the 125 days each year they do not use any sick days. Upon normal retirement or death, employees are paid for one half of their accumulated sick days at their current salary rate. Accumulated sick pay is considered to be vested at the employees' normal retirement date in the amount of one half of the accumulated number of days.

The liability for compensated absences attributable to the City's governmental funds is recorded in the entitywide statements. The amount attributable to the business-type activities is charged to expense with a corresponding liability established in the entity wide statements as well as the applicable business-type funds.

Other Post Employment Benefits - In addition to providing pension benefits (Note 6), the City provides certain health benefits for retired or disabled employees. Employees hired before May 1, 1987, become eligible for these benefits if they reach normal retirement age while working for the City or if they withdraw from active employment due to disability. These benefits originated through resolutions and personnel agreements and are provided through an insurance company. During the fiscal year ended April 30, 2019, the City implemented GASB Statement No. 75, Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions. standard establishes standards for governmental employer recognition, measurement, and presentation of information about other postemployment benefits (OPEB). actuarily determined Net OPEB obligation is now recorded as a liability on the government wide financial statements as well as the related deferred inflows and The City pays the cost of this benefit on a outflows. "pay as you go basis" currently. See Note 6 for additional disclosures.

#### I. Net Position

The government-wide and business-type fund financial statements utilize a net position presentation. Net position is categorized as investment in fixed assets (net of related debt), restricted and unrestricted.

Net Investment in Capital Assets - is intended to reflect the portion of net position which is associated with non-liquid capital assets less outstanding capital asset related debt. The net related debt is the outstanding capital debt less any unspent debt proceeds (held as liquid assets) and any associated unamortized cost.

Restricted Net Position - represents liquid assets (generated from revenues and net bond proceeds) which have third party (statutory, bond covenant, or granting agency) limitations on their use. The City would typically use restricted net position first, as appropriate opportunities arise, but reserve the right to selectively defer the use thereof to a future project or replacement equipment acquisition.

Unrestricted Net Position - represent unrestricted liquid assets. While City management may have categorized and segmented portions for various purposes, the City Council has the unrestricted authority to revisit or alter these managerial decisions.

## J. Pensions

In government-wide financial statements, pensions are required to be recognized and disclosed using the accrual basis of accounting (see Note 6 and the required supplementary information immediately following the notes to the financial statements for more information), regardless of the amount recognized as pension expenditures on the modified accrual basis of accounting. The City recognizes a net pension liability for each qualified pension plan in which it participates, which represents the excess of the total pension liability over the fiduciary net position of the qualified pension plan, or the City's proportionate share thereof in the case of an agent multiple-employer plan, measured as of the City's fiscal year end. Changes in the net pension liability during the period are recorded as pension expense, or as deferred outflows or inflows of resources depending on the nature of the change, in the period incurred. Those changes in net pension liablity that are recorded as deferred outflows or inflows of resources that arise from changes in actuarial assumptions or other inputs and differences between expected or actual experience are amortized over the weighted average remaining service life of all participants in the respective qualified pension plan and recorded as a component of pension expense beginning with the period in which they are incurred. Projected earnings on qualified pension plan investments are recognized as a component of pension expense. Differences between projected and actual investment earnings are reported as deferred outflows or inflows of resources and amortized as a component of pension expense on a closed basis over a fiveyear period beginning with the period in which the difference occurred.

The City implemented GASB Statement No. 68 "Accounting and Financial Reporting for Pensions - an amendment of GASB Statement No. 27" ("GASB No. 68") and GASB Statement No. 71, "Pension Transition for Contributions Made Subsequent to the Measurement Date - an amendment of GASB Statement No. 68" ("GASB No. 71" and collectively "Statements") in the year ended April 30, 2016. The primary objective of these Statements is to improve accounting and financial reporting by state and local governments for pensions. In addition, state and local governments who participate in a cost-sharing multiple employer plan are now required to recognize a liability for their proportionate share of the net pension

liability of that plan. It is GASB's intention that these Statements will provide citizens and other users of the financial statements with a clearer picture of the size and nature of the City's financial obligations to current and former employees for past services rendered. In particular, these Statements require the City to recognize a net pension liability, deferred outflows of resources, and deferred inflows of resources for its participation in the Illinois Municipal Retirement Fund and its Police and Firefighters' Pension Funds, on financial statements prepared on the economic resources measurement focus and accrual basis of accounting (i.e., the Statements of Net Position) and present more extensive note disclosures.

## K. Accounting Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions. Those estimates and assumptions affect the reported amounts of assets and deferred outflows of resources (if any) and liabilities and deferred inflows of resources (if any) and disclosure of these balances as of the date of the financial statements. In addition, they affect the reported amounts of revenues and expenditures/expenses during the reporting period. Actual results could differ from those estimates and assumptions.

## L. Comparative Data

Comparative data (i.e. presentation of prior year totals by fund type) has not presented in each of the statements since their inclusion would make the statements unduly complex and difficult to read.

## M. Change in Accounting Principle

For the fiscal year ended April 30, 2019, the City implemented GASB Statement No. 75, Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions. This standard establishes standards for governmental employer recognition, measurement, and presentation of information about other postemployment benefits (OPEB). To establish beginning balances for the total OPEB liability, the fiscal year ended April 30, 2018 ending net positions for the City's government-wide and enterprise fund financial statements were restated as disclosed in Note 13. The primary objective of these Statements is to improve accounting and financial reporting by state and local governments for OPEB. GASB's intention that these Statements will provide citizens and other users of the financial statements with a clearer picture of the size and nature of the City's financial obligations to current and former employees for past services rendered. In particular, these Statements require the City to recognize a total OPEB liability, deferred outflows of

resources, and deferred inflows of resources for its OPEB Plan on financial statements prepared on the economic resources measurement focus and accrual basis of accounting (i.e., the Statements of Net Position) and present more extensive note disclosures.

The adoption of these Statements had no impact on the City's governmental fund financial statements, which continue to report expenditures in the amount of the actual contributions. However, the adoption has resulted in the restatement of the City's net position as of May 1, 2018, for its government-wide and enterprise fund financial statements to reflect the reporting of total OPEB liabilities and deferred outflows of resources for its Plan in accordance with the provisions of this Statement. Net position of the City's government-wide and enterprise fund financial statements as of May 1, 2018, was decreased by \$9,100,163 and \$1,611,919, respectively, reflecting the cumulative change in accounting principle related to the adoption of this Statement. See Note 6 for more information regarding the City's OPEB plan.

## N. Impact of Recently Issued Accounting Principles

## Recently Adopted Accounting Pronouncements

In June 2015, GASB issued Statement No. 75, Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions ("GASB 75"). GASB 75 establishes accounting and financial reporting standards for OPEB that is provided to employees of state and local governmental employees. The requirements of GASB 75 are effective for fiscal years beginning after June 15, 2017. See Note 6 and Note 13 for the impact of GASB 75 on the City's financial statements.

In March 2017, GASB issued Statement No. 85, Omnibus 2017 ("GASB 85"). GASB 85 includes a variety of small technical revisions to previously issued GASB statements. The requirements of GASB 85 are effective for periods beginning after June 15, 2017, with earlier application encouraged. No effect occurred from the adoption of GASB 85 on the City's financial statements.

In May 2017, GASB issued Statement No. 86, Certain Debt Extinguishment Issues ("GASB 86"). GASB 86 provides guidance for reporting the in-substance defeasance of outstanding debt obligations using existing resources. Qualifying transactions will remove both the assets placed into trust and the related debt obligation from the government's statement of net position. The requirements of GASB 86 are effective for reporting periods beginning after June 15, 2017, with earlier application encouraged. No effect occurred from the adoption of GASB 86 on the City's financial statements.

## Recently Issued Accounting Pronouncements

In November 2016, GASB issued Statement No. 83, Certain Asset Retirement Obligations ("GASB 83"). GASB 83 addresses accounting and financial reporting for certain asset retirement obligations - legally enforceable liabilities associated with the retirement of a tangible capital asset. The requirements of GASB 83 are effective for reporting periods beginning after June 15, 2018, with earlier application encouraged. Management is currently evaluating the impact of GASB 83 on the City's financial statements.

In January 2017, GASB issued Statement No. 84, Fiduciary Activities (GASB 84"). GASB 84 establishes new criteria for determining how to report fiduciary activities in governmental financial statements. The focus is on whether the government is controlling the assets, and who the beneficiaries are. Under this revised standard, certain activities previously reported in agency funds may be reclassified in future periods. The requirements of GASB 84 are effective for reporting periods beginning after December 15, 2018, with earlier application encouraged. Management is currently evaluating the impact of GASB 84 on the City's financial statements.

In June 2017, GASB issued Statement No. 87, Leases ("GASB 87"). GASB 87 requires recognition of certain lease assets and liabilities for leases that previously were classified as operating leases and recognized as inflows of resources or outflows of resources based on the payment provisions of the contract. Under this statement, a lessee is required to recognize a lease liability and an intangible right-to-use lease asset, and a lessor is required to recognize a lease receivable and a deferred inflow of resources. The requirements of GASB 87 are effective for reporting periods beginning after December 15, 2019, with earlier application encouraged. Management is currently evaluating the impact of GASB 87 on the City's financial statements.

In April 2018, GASB issued Statement No. 88, Certain Disclosures Related to Debt, including Direct Borrowings and Direct Placements ("GASB 88"). GASB 88 provides guidance on note disclosures related to debt, including direct borrowings and direct placements. It also clarifies which liabilities governments should include when disclosing information related to debt. The requirements of GASB 88 are effective for reporting periods beginning after June 15, 2018, with earlier application encouraged. Management is currently evaluating the impact of GASB 88 on the City's financial statements.

In June 2018, GASB issued Statement No. 89, Accounting for Interest Cost Incurred before the End of a Construction Period ("GASB 89"). GASB 89 requires that interest costs incurred before the end of a construction period be recognized as an expense in the period in which the cost is incurred. As a result, the interest cost incurred before the end of a construction period will not be included in the historical cost of a capital asset reported in a business-type or enterprise fund. The requirement of GASB 89 are effective for reporting periods beginning after December 15, 2019, with earlier application encouraged. Management is currently evaluating the impact of GASB 89 on the City's financial statements.

In August 2018, GASB issued Statement No. 90, Majority Equity Interests - An Amendment of GASB Statements No. 14 and No. 61 ("GASB 90"). GASB 90 improves the consistency and comparability of reporting a government's majority equity interest in a legally separate organization and to improve the relevance of financial statement information for certain component units. The requirements of GASB 90 are effective for reporting periods beginning after December 15, 2018, with earlier application encouraged. Management is currently evaluating the impact of GASB 90 on the City's financial statements.

In May 2019, GASB issued Statement No. 91, Conduit Debt Obligations ("GASB 91"). GASB 91 provides a single method of reporting conduit debt obligations by issuers and eliminate diversity in practice associated with (1) commitments extended by issuers, (2) arrangements associated with conduit debt obligations, and (3) related note disclosures. This Statement improves the comparability of financial reporting for issuers by eliminating the option to recognize a liability for a conduit debt obligation. The requirements of GASB 91 are effective for reporting periods beginning after December 15, 2020, with earlier application encouraged. Management is currently evaluating the impact of GASB 91 on the City's financial statements.

### Note 2. STEWARDSHIP, COMPLIANCE, AND ACCOUNTABILITY

- Compliance with Finance Related Legal and Contractual Provisions - The City incurred no material violations of finance related legal and contractual provisions.
- Excess of Expenditures Over Appropriations in Individual Funds - The City incurred material excess of expenditures over appropriations in individual funds. See Note 8 for a detailed listing.
- 3. Net Position/Fund Balance Deficit At April 30, 2019 and 2018, the following deficit fund balances existed:

General Corporate
Industrial Park TIF

| 2019 |                |      | 2018       |  |  |  |
|------|----------------|------|------------|--|--|--|
|      | \$(19,677,834) | \$ ( | 9,056,675) |  |  |  |
|      | N/A            | \$   | (305.755)  |  |  |  |

## Note 3. CASH, INVESTMENTS, RESTRICTED ASSETS, RESERVES, AND DESIGNATED FUND BALANCES

Statutes authorize the City to invest in deposits with qualified financial institutions, obligations of the U.S. Treasury, obligations secured by U.S. Government agencies, qualified short-term corporate obligations, qualified money market mutual funds, certain insurance contracts, and qualified repurchase agreements. The police and firefighters' pension funds are allowed to invest up to 50% of their assets in the domestic equity market.

Custodial credit risk for deposits is the risk that, in the event of a bank failure, the City's deposits may not be returned or the City will not be able to recover collateral securities in the possession of an outside party. The City requires deposits to be secured by collateral value at market or par, whichever is lower, less the amount covered by F.D.I.C. All of the City's deposits are insured or collateralized with securities held by the pledging financial institution's trust department but not in the authorities' name.

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. The City's investments consist of certificates of deposit with a maturity of one year or less to avoid any material interest rate risk.

Concentration of credit risk is the risk of loss attributed to the magnitude of the City's investment in a single issuer. The City requires collateralization of any deposits that exceed the F.D.I.C. limits.

The following schedule summarizes the City's investments, deposits, and cash on hand at April 30, 2019:

|                              |   |                          | Fair<br>Value/<br>Carrying | Institution<br>Carrying | F.D.I.C./<br>S.P.I.C.<br>Insured | Collat-<br>eralized |              | U.S.<br>Government<br>Treasuries | Uncollateralize     | d Not                     |

Foreign fire insurance tax receipts originate from a tax assessed on every corporation, company, and association which is not incorporated in Illinois and which is providing fire insurance within the City. The tax receipts, assessed from the gross premiums, are reserved for the maintenance, use and benefit of the Fire Department. The receipts and disbursements from these funds have been turned over to the Foreign Fire Insurance Board of the City of Mt. Vernon, Illinois. The City of Mt. Vernon, Illinois does not collect or disburse these funds. Therefore, the funds of this board are not included in the City of Mt. Vernon, Illinois' Funds for Financial Statement reporting. However, in order to comply with subsection (h) of Section 6 of Article VII of the Illinois Constitution, the receipts and disbursements of the Foreign Fire Insurance Board of the City of Mt. Vernon, Illinois were reviewed and verified to be in compliance. The beginning balance of the fund was \$157,473, expenditures were \$41,186 consisting of remodeling, dishwasher, TV, recliners, EMS coats, monitors and system software, etc., tax receipts were \$60,236 and interest income was \$766, leaving an ending balance of \$177,289. Members of the board are: Boczek, President; Daniel Plumb, Secretary; Kevin Sargent, Treasurer; Brad Baum, Board Member; Chris Yenne, Board Member; Casey McCommons, Board Member; and Brian Pendley, Board Member. The board carries a surety bond of \$100,000.

Restricted assets, liabilities payable from restricted assets, and restricted net position on April 30, 2019, in the enterprise fund consist of the following:

Customer deposits

Fund balances in the pension trust funds are reserved by Illinois statutes up to the total actuarial requirements of these funds.

Refer to Note 6 for presentation of the unfunded accrued liabilities of the police pension fund and the firefighters' pension fund.

As of April 30, 2019 fund balances of the governmental funds are classified as follows:

- Nonspendable fund balance amounts that are not in spendable form (such as inventory) or are required to be maintained intact.
- Restricted fund balance amounts constrained to specific purposes by their providers (such as grantors, bondholders, and higher levels of government), through constitutional provisions, or by enabling legislation.
- Committed fund balance amounts constrained to specific purposes by the City itself, using its highest level of decision-making authority (i.e., City Council). To be reported as committed, amounts cannot be used for any other purpose unless the City takes the same highest level action to remove or change the constraint.
- Assigned fund balance amounts the City intends to use for a specific purpose. Intent can be expressed by the City Council or by an official or body to which the City Council delegates the authority.
- Unassigned fund balance amounts that are available for any purpose. Positive amounts are reported only in the general fund.

As of April 30, 2019 fund balances are composed of the following:

|                         | General<br>Corporate | Quality<br>of Life | General<br>Corporate<br>Capital | Motor Fuel       | Home Rule<br>Tax   | TIF<br>Downtown  | Other<br>Governmental<br>Funds | Total<br>Governmental<br>Funds |

<sup>\*</sup>From restated net position per GASB 75. (See Note 13)

The City issues general obligation bonds to provide funds for the acquisition and construction of major capital facilities. General obligation bonds are direct obligations and pledge the full faith and credit of the City. General obligation bonds and promissory notes issued for business-type activities are repaid from those activities.

Legal Debt Margin - Article VII, Section 6(k) of the 1970 Illinois Constitution governs the computation of legal debt margin. "The General Assembly may limit by law the amount and require referendum approval of debt to be incurred by home rule municipalities, payable from ad valorem property tax receipts, only in excess of the following percentages of the assessed value of its taxable property...'(3) if its population is 25,000 or less, an aggregate of one-half percent. Indebtedness which is outstanding on the effective date of this Constitution or which is thereafter approved by referendum or assumed from another unit of local government shall not be included in the foregoing percentage amounts. To date the Illinois General Assembly has set no limits for home rule municipalities. The City is a home rule municipality.

# Principal and interest payments in subsequent years:

# Operating Leases

Although the City is not a party to a capital lease agreement, the City has entered into a number of operating leases. These leases have cancellation provisions and are subject to annual appropriations. For the year ended April 30, 2019, lease expenditures were \$34,329.

# Note 6. RETIREMENT COMMITMENTS

The oversight unit of the City maintains two pension trust funds and participates in the Illinois Municipal Retirement Fund (I.M.R.F.).

The City contributes to the Illinois Municipal Retirement Fund, the Police Pension Fund, and the Firefighters' Pension Fund. At April 30, 2019, the City reported the following aggregate amounts related to these pension plans:

| Statement of Net Position and Statement of Activities | Governmental Activities | Business-Type<br>Activities | Total        |
|---|-------------------------|-----------------------------|--------------|
| Net pension liabilities Deferred outflows (inflows)   | \$34,051,557            | \$1,391,767                 | \$35,443,324 |
| of resources  | 6,651,360               | 729,489                     | 7,380,849    |
| Pension expense                                       | 4,137,205               | 262,711                     | 4,399,916    |

# Pension Trust Funds

# Plan Descriptions

# Police Pension

Police Department sworn personnel are covered by the Police Pension Plan which is a defined benefit single-employer pension plan. Although this is a single-employer pension plan, the defined benefits and employee and employer contribution levels are governed by Illinois State Statutes (Chapter 108½ - Article 3) and may be amended only by the Illinois legislature. The City accounts for the plan as a pension trust fund. The City's payroll for employees covered by the Police Pension Plan for the year ended April 30, 2019, was \$2,554,379 out of a total payroll of \$8,615,342. At April 30, 2019, the Police Pension Plan membership consisted of:

| Retirees and beneficiaries currently receiving benefits and terminated employees entitled to benefits but not yet receiving them | <u>34</u>      |
|--|----------------|
| Current employees Vested Nonvested   | 18<br>24<br>42 |
| Total  | <u>76</u>      |

The following is a summary of the Police Pension Plan as provided for in the Illinois State Statutes.

The Police Pension Plan provides retirement benefits as well as death and disability benefits. Employees attaining the age of 50 or more with 20 or more years of creditable service are entitled to receive an annual retirement benefit of one-half of the salary attached to the rank held on the last day of service, or for one year prior to the last day, whichever is greater. The pension shall be increased by 2.5% of such salary for each additional year of service over 20 years up to 30 years to a maximum of 75% of such salary. Employees with at least 8 years but less than 20 years of credited service may retire at or after age 60 and receive a reduced benefit.

The monthly pension of a police officer who retired with 20 or more years of service after January 1, 1977, shall be increased annually, following the first anniversary date of retirement and be paid upon reaching the age of at least 55 years, by 3% of the original pension and 3% simple interest annually thereafter.

Covered employees are required to contribute 9.91% of their base salary to the Police Pension Plan. If an employee leaves covered employment with less than 20 years of service, accumulated employee contributions may be refunded without accumulated interest. The City is required to contribute the remaining amounts necessary to finance the plan as actuarially determined by an enrolled actuary. By the year 2041, the City's contributions must accumulate to the point where the past service cost for the Police Pension Plan is 90% funded.

The Fund's investment policy in accordance with ILCS establishes the following target allocation across asset classes:

| Asset Class               | <u> Target</u> | Long-Term<br>Expected Real<br>Rate of Return |
|---------------------------|----------------|--|
| Fixed income              | 30-60%         | 0.70%  |
| Domestic equities         | 35-65%         | 5.80%  |
| Cash and cash equivalents | 0-5%           | 0.50%  |

ILCS limit the Fund's investments in equities, mutual funds and variable annuities to 65%. Securities in any one company should not exceed 5% of the total fund. The blended asset class is comprised of all other asset classes to allow for rebalancing the portfolio.

The long-term expected rate of return on the Fund's investments was determined using an asset allocation study in which best estimate ranges of expected future real rates of return (net of pension plan investment expense and inflation) were developed for each major assets class. These ranges were combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates or arithmetic real rates of return excluding inflation for each major asset class included in the Fund's target asset allocation as of April 30, 2019, are listed in the table above.

## Investment Valuations

All investments in the plan are stated at fair value and are recorded as of the trade date. Fair value is based on quoted market prices at April 30 for debt securities, equity securities and mutual funds and contract values for insurance contracts. Illinois Funds, an investment pool created by the state legislature under the control of the State Treasurer, is a money market mutual fund that maintains a \$1 per share value.

## Discount Rate

The discount rate used to measure the total pension liability was 5.97%. The projection of cash flows used to determine the discount rate assumed that member contributions will be made at the current contribution rate and that the City contributions will be made at rates equal to the difference between actuarially determined contribution rates and the member rate. Based on those assumptions, the Fund's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments of 6.75% was blended with the index rate of 3.79% for tax exempt general obligation municipal bonds rated AA or better at April 30, 2019, to arrive at a discount rate of 5.97% used to determine the total pension liability.

# Discount Rate Sensitivity

The following is a sensitive analysis of the net pension liability to changes in the discount rate. The table below presents the pension liability of the City calculated using the discount rate of 5.97% as well as what the City's net pension liability would be if it were calculated using a discount rate that is 1 percentage point lower (4.97%) or 1 percentage point higher (6.97%) than the current rate:

|                          | 1% Decrease<br>(4.97%) | Current Discount Rate (5.97%) | 1% Increase (6.97%) |
|--------------------------|------------------------|-------------------------------|---------------------|
| Net pension<br>liability | \$21,021,368           | \$15,486,286                  | \$11,033,382        |

The net position at April 30, 2019, consisted of the following components:

| Reserved for employee contributions | \$ 8,178,127  |
|-------------------------------------|---------------|
| Reserved for retirement benefits    | 22,415,714    |
| Unreserved net position (deficit)   | (10,246,009)  |
| Net Position                        | \$ 20,347,832 |

The components of the net pension liability at April 30, 2019 are as follows:

| Total pension liability                        | \$ 35,834,118        |
|--|----------------------|
| Plan's fiduciary net position                  | 20,347,832           |
| Net pension liability                          | <u>\$ 15,486,286</u> |
| Plan fiduciary net position as a percentage of |                      |
| total pension liability                        | 56.78%               |

Pension expense and deferred outflows/inflows of resources for the year ended April 30, 2019, the City recognized pension expense for police pension of \$1,718,213. At April 30, 2019, the City reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

|   | Deferred Outflows of Resources | Deferred Inflows of Resources |
|---|--------------------------------|-------------------------------|
| Differences between expected and actual experience Assumption changes | \$ 226,843<br>2,289,977        | \$126,685<br>-0-              |
| Net difference between projected and actual earnings on pension       |                                |                               |
| plan investments<br>Total   | 595,674<br>\$3,112,494         | 391,993<br><u>\$518,678</u>   |

Amounts reported as deferred outflows of resources and deferred inflows of resources related to the police pension will be recognized in pension expense as follows:

| Year Ended<br>April 30 |             |
|------------------------|-------------|
| 2020                   | \$ 578,929  |
| 2021                   | 262,647     |
| 2022                   | 385,343     |
| 2023                   | 434,206     |
| 2024                   | 364,361     |
| Thereafter             | 568,330     |
|                        | \$2,593,816 |

## Rate of Return

For the year ended April 30, 2019, the annual money-weighted rate of return on pension plan investments, net of pension plan investment expense, was 5.40%. The money-weighted rate of return expresses investment performance, net of investment expense, adjusted for the changing amounts actually invested.

Significant accounting policies for the police pension fund are summarized in Note 1.

# Firefighters' Pension

Fire Department sworn personnel are covered by the Firefighters' Pension Plan which is a defined benefit single-employer pension plan. Although this is a single-employer pension plan, the defined benefits as well as the employee and employer contribution levels are mandated by Illinois State Statutes (Chapter 108½ - Pensions - Article 4) and may be amended only by the Illinois legislature. The City accounts for the plan as a pension trust fund. The City's payroll for employees covered by the Firefighters' Pension Plan for the year ended April 30, 2019, was \$2,029,652 out of a total payroll of \$8,615,342. At April 30, 2019, the Firefighters' Pension Plan membership consisted of:

| Retirees and beneficiaries currently receiving benefits and terminated employees entitled to benefits but not yet receiving them | <u>34</u>            |
|--|----------------------|
| Current employees Vested Nonvested   | 24<br><u>5</u><br>29 |
| Total  | <u>63</u>            |

The following is a summary of the Firefighters' Pension Plan as provided for in the Illinois State Statutes.

The Firefighters' Pension Plan provides retirement benefits as well as death and disability benefits. Employees attaining the age of 50 or more with 20 or more years of creditable service are entitled to receive a monthly retirement benefit of one-half of the monthly salary attached to the rank held in the fire service at the date of retirement. The monthly pension shall be increased by one-twelfth of 2.5% of such monthly salary for each additional month over 20 years of service through 30 years of service to a maximum of 75% of such monthly salary. Employees with at least 10 years but less than 20 years of credited service may retire at or after age 60 and receive a reduced retirement The monthly pension of a firefighter who retired with 20 or more years of service after January 1, 1977, shall be increased annually, following the first anniversary date of retirement and paid upon reaching at least the age 55, by 3% of the original pension and 3% annually thereafter.

Covered employees are required to contribute 9.455% of their salary to the Firefighters' Pension Plan. If an employee leaves covered employment with less than 20 years of service, accumulated employee contributions may be refunded without interest. The City is required to contribute the remaining amounts (not less than 94%) necessary to finance the plan as actuarially determined by an enrolled actuary. By the year 2041, the City's contributions must accumulate to the point where the past service cost for the Firefighters' Pension Plan is 90% funded.

The Fund's investment policy in accordance with ILCS establishes the following target allocation across asset classes:

|                        |        | Long-Term      |
|------------------------|--------|----------------|
|                        |        | Expected Real  |
| Asset Class            | Target | Rate of Return |
| Fixed income           | 0-80%  | 0.70%          |
| Equities               | 0-15%  | 5.80%          |
| International equities | 0-5%   | 5.90%          |

ILCS limit the Fund's investments in equities, mutual funds and variable annuities to 65%. Securities in any one company should not exceed 5% of the total fund. The blended asset class is comprised of all other asset classes to allow for rebalancing the portfolio.

The long-term expected rate of return on the Fund's investments was determined using an asset allocation study in which best estimate ranges of expected future real rates of return (net of pension plan investment expense and inflation) were developed for each major assets class. These ranges were combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates or arithmetic real rates of return excluding inflation for each major asset class included in the Fund's target asset allocation as of April 30, 2019, are listed in the table above.

# Investment Valuations

All investments in the plan are stated at fair value and are recorded as of the trade date. Fair value is based on quoted market prices at April 30 for debt securities, equity securities and mutual funds and contract values for insurance contracts. Illinois Funds, an investment pool created by the state legislature under the control of the State Treasurer, is a money market mutual fund that maintains a \$1 per share value.

## Discount Rate

The discount rate used to measure the total pension liability was 6.15%. The projection of cash flows used to determine the discount rate assumed that member contributions will be made at the current contribution rate and that the City contributions will be made at rates equal to the difference between actuarially determined contribution rates and the member rate. Based on those assumptions, the Fund's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments of 6.75% was blended with the index rate of 3.79% for tax exempt general obligation municipal bonds rated AA or better at April 30, 2019, to arrive at a discount rate of 6.15% used to determine the total pension liability.

# Discount Rate Sensitivity

The following is a sensitive analysis of the net pension liability to changes in the discount rate. The table below presents the pension liability of the City calculated using the discount rate of 6.15% as well as what the City's net pension liability would be if it were calculated using a discount rate that is 1 percentage point lower (5.15%) or 1 percentage point higher (7.15%) than the current rate:

|             | 1% Decrease  | Current Discount | 1% Increase  |
|-------------|--------------|------------------|--------------|
|             | (5.15%)      | Rate (6.15%)     | (7.15%)      |
| Net pension |              |                  | ·            |
| liability   | \$19,780,301 | \$14,869,448     | \$10,923,429 |

The net position at April 30, 2019, consisted of the following components:

| Reserved for employee contributions | \$ 10,617,834 |
|-------------------------------------|---------------|
| Reserved for retirement benefits    | 15,927,532    |
| Unreserved net position (deficit)   | (10,419,342)  |
| Net Position                        | \$ 16,126,024 |

The components of the net pension liability at April 30, 2019, are as follows:

| Total pension liability Plan's fiduciary net position Net pension liability | \$ 30,995,472<br>16,126,024<br>\$ 14,869,448 |
|---|--|
| Plan fiduciary net position as a percentage of total pension liability      | 52.03%                                       |

Pension expense and deferred outflows/inflows of resources for the year ended April 30, 2019, the City recognized pension expense for fire pension of \$1,721,365. At April 30, 2019, the City reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

|                                  | Deferred Outflows of Resources | Deferred Inflows<br>of Resources |
|----------------------------------|--------------------------------|----------------------------------|
| Differences between expected and |                                |                                  |
| actual experience                | \$ 16,956                      | \$270 <b>,</b> 161               |
| Assumption changes               | 1,736,674                      | -0-                              |
| Net difference between projected |                                |                                  |
| and actual earnings on pension   |                                |                                  |
| plan investments                 | 924,944                        | <u> 266,440</u>                  |
| Total                            | \$2,678,574                    | \$536,601                        |

Amounts reported as deferred outflows of resources and deferred inflows of resources related to the Fire Pension will be recognized in pension expense as follows:

| Year Ended<br>April 30 |             |
|------------------------|-------------|
| 2020                   | \$ 585,075  |
| 2021                   | 327,563     |
| 2022                   | 448,242     |
| 2023                   | 429,738     |
| 2024                   | 213,103     |
| Thereafter             | 138,252     |
|                        | \$2,141,973 |

# Rate of Return

For the year ended April 30, 2019, the annual money-weighted rate of return on pension plan investments, net of pension plan investment expense, was 1.69%. The money-weighted rate of return expresses investment performance, net of investment expense, adjusted for the changing amounts actually invested.

Significant accounting policies for the firefighters' pension fund are summarized in Note 1.

# Significant Investments

The following are investments (other than U.S. Government and U.S. Government-guaranteed obligations) in any one organization that represents 5% or more of net position available for benefits:

| Police      | Firefighters'  |
|-------------|--|
| Pension     | Pension  |
| \$2,646,275 | \$ -0-   |
| 1,369,127   | -0-  |
| 1,135,259   | -0-  |
| 1,206,966   | -0-  |
| 1,253,042   | -0-  |
| 1,433,231   | -0-  |
| -0-         | 2,650,830  |

# Funding Status and Progress

The amount shown below as the "pension benefit obligation" is a standardized disclosure measure of the present value of pension benefits, adjusted for the effects of projected salary increases and step-rate benefits, estimated to be payable in the future as a result of employee service to date. The measure is intended to help users assess the funding status of the System on a going-

concern basis, assess progress made in accumulating sufficient assets to pay benefits when due, and make comparisons among employers. The measure is the actuarial present value of credited projected benefits and is independent of the funding method used to determine contributions to the System.

Actuarial assumptions and changes are listed in the required supplementary information section of this report for both the police pension fund and the firefighters' pension fund. Please refer to this portion of the report for assumption used.

# Effects on the Pension Benefit Obligation of Current-Year Changes

There were current-year changes in actuarial assumptions. Actuarial assumptions and changes are listed in the required supplementary information section of this report for both the police pension fund and the firefighters' pension fund. Please refer to this portion of the report for the changes and the assumptions used. There was not any changes in benefit provisions that affected the pension benefit obligation of either the police pension fund or the firefighters' pension fund.

# <u>Actuarially Determined Contribution Requirements and Contributions Made</u>

Police Pension and Firefighters' Pension

The Systems' funding policy provides for actuarially determined periodic contributions at rates that, for individual employees, accumulate assets gradually over time so that sufficient assets will be available to pay benefits when due. The rate for the City's employee group as a whole has tended to remain level as a percentage of annual covered payroll. The contribution rate for normal cost is determined using the entry age normal actuarial funding method.

The significant actuarial assumptions used to compute the actuarially determined contribution requirements and those used to compute the pension benefit obligation are listed in the required supplementary information section of this report for both the police pension fund and the firefighters' pension fund. Please refer to this portion of the report for assumption used.

# Effects on the Contribution Requirements of Current-Year Changes

There were current-year changes in the actuarial assumptions effecting the contribution requirements of the police pension fund and the firefighters' pension fund. Actuarial assumptions and changes are listed in the required supplementary information section of this report for both the police pension fund and the firefighters' pension fund. Please refer to this portion of the report for the changes and the assumptions used.

# Trend Information

Trend information gives an indication of the progress made in accumulating sufficient assets to pay benefits when due. Trend information is found in the required supplementary information section of the City's comprehensive annual financial report.

# I.M.R.F.

The City's defined benefit pension plan for regular employees provides retirement and disability benefits, post retirement increases, and death benefits to plan members and beneficiaries. The employer plan is affiliated with the Illinois Municipal Retirement Fund (I.M.R.F.), an agent multiple-employer plan. Benefit provisions are established by statute and may only be changed by the General Assembly of the State of Illinois. I.M.R.F. issues a publicly available financial report that includes financial statements and required supplementary information (RSI). That report may be obtained online at www.imrf.org.

All employees hired in positions that meet or exceed the prescribed annual hourly standard must be enrolled in I.M.R.F. as participating members unless they are covered by the police pension fund or the firefighters' pension fund for the same service. Pension benefits vest after eight years of service. Participating members who retire at or after age 60 with eight years of credited service are entitled to an annual retirement benefit, payable monthly for life, in an amount equal to 1 2/3% of their final rate of earnings for each year of credited service up to 15 years and 2% for each year thereafter. I.M.R.F. also provides death and disability benefits. These benefit provisions and all other requirements are established by state statute.

Funding Policy - As set by statute, your employer regular plan members are required to contribute 4.50% of their annual covered salary. The statute requires employers to contribute the amount necessary, in addition to member contributions, to finance the retirement coverage of its own employees. The employer annual required contribution rate for calendar year 2018 used by the employer was 14.03% of annual covered payroll. The employer annual required contribution rate for calendar year 2017 was 15.20%. The employer also contributes for disability benefits, death benefits and supplemental retirement benefits, all of which are pooled at the I.M.R.F. level. Contribution rates for disability and death benefits are set by the I.M.R.F. Board of Trustees, while the supplemental retirement benefits rate is set by statute.

Annual Pension Cost - For calendar year ending December 31, 2018, the employer's actual contributions for pension cost for the calendar year 2018 were \$518,376. Its required contribution for calendar year 2018 was \$527,613.

The required contribution for 2018 was determined as part of the December 31, 2016 actuarial valuation using the entry age normal actuarial cost method. The actuarial assumptions at December 31, 2016, included (a) 7.5% investment rate of return (net of administrative and direct investment expenses), (b) projected salary increases of 3.50% a year, attributable to inflation, (c) additional projected salary increases ranging from 0.4% to 10% per year depending on age and service, attributable to seniority/merit, and (d) post retirement benefit increases of 3% annually.

The actuarial value of your employer regular plan assets was determined using techniques that spread the effects of short-term volatility in the market value of investments over a five-year period with a 20% corridor between the actuarial and market value of assets. The employer regular plan's unfunded actuarial accrued liability at December 31, 2016, is being amortized as a level percentage of projected payroll on an open 25 year basis.

Funded Status and Funding Progress - As of December 31, 2018, the most recent actuarial valuation date, the regular plan was 60.96% funded. The total pension liability was \$33,680,195 and the plan fiduciary net position was \$28,592,603, resulting in a net pension liability of \$5,087,592. The covered payroll for calendar year 2018 (annual payroll of active employees covered by the plan) was \$3,694,768 and the ratio of the net pension liability to the covered payroll was 137.70%. The plan fiduciary net position as a percentage of the total pension liability was 84.89%.

Summary of Actuarial Methods and Assumptions Used in the Calculation of the Total Pension Liability

Methods and Assumptions Used to Determine Total Pension Liability:

Actuarial Cost Method Amortization Method Asset Valuation Method Wage Growth Price Inflation Salary Increases Investment Rate of Return

Retirement Age

Mortality

Aggregate Entry Age Normal

Level Percentage of Payroll Closed

5 Year Smoothed Market, 20% Corridor

3.75% to 14.50%

7.50%

Experience-based table of rates that are specific to the type of eligibility condition. Last updated for the 2014 valuation pursuant to an experience study of the period 2011-2013.

For non-disabled retirees, an I.M.R.F. specific mortality table was used with fully generational projection scale MP-2014 (base year 2012). The I.M.R.F. specific rates were developed from the RP-2014 Blue Collar Health Annuitant Mortality Table with adjustments to match current I.M.R.F. experience. For disabled retirees, an I.M.R.F. specific mortality table was used with fully generational projection scale MP-2014 (base year 2012). The I.M.R.F. specific rates were developed from the RP-2014 Disabled Retirees Mortality Table applying the same adjustment that was applied for nondisabled lives. For active members, an I.M.R.F. specific mortality table was used with fully generational projection scale MP-2014 (base year 2012). The I.M.R.F. specific rates were developed from the RP-2014 Employee Mortality Table with adjustments to match current I.M.R.F. experience.

Other Information:

Notes

There were no benefit changes during the year.

A detailed description of the actuarial assumptions and methods can be found in the December 31, 2018 Illinois Municipal Retirement Fund annual actuarial valuation report.

# Discount Rate Sensitivity

The following is a sensitive analysis of the net pension liability to changes in the discount rate. The table below presents the pension liability of the City calculated using the discount rate of 7.25% as well as what the City's net pension liability would be if it were calculated using a discount rate that is 1 percentage point lower (6.25%) or 1 percentage point higher (8.25%) than the current rate:

|                               | 1% Decrease 6.25% | Current Discount<br>Rate 7.25% | 1% Increase<br>8.25% |
|-------------------------------|-------------------|--------------------------------|----------------------|
| Net pension liability (asset) | \$8,822,180       | \$5,087,592                    | \$(1,966,760)        |

The net position at April 30, 2019, consisted of the following components:

| Reserved for employee contributions | \$ 2,847,405 |
|-------------------------------------|--------------|
| Reserved for employer contributions | 1,136,387    |
| Reserved for retirement benefits    | 24,608,811   |
| Net Position                        | \$28,592,603 |

The components of the net pension liability at April 30, 2019, are as follows:

| Total pension liability       | \$33,680,195 |
|-------------------------------|--------------|
| Plan's fiduciary net position | 28,592,603   |
| Net pension liability         | \$ 5,087,592 |

Plan fiduciary net position as a percentage of total pension liability

84.89%

Pension expense and deferred outflows/inflows of resources for the year ended April 30, 2019, the City recognized pension expense for I.M.R.F. of \$960,338. At April 30, 2019, the City reported deferred outflows of resources and deferred inflows of resources related to I.M.R.F. from the following sources:

|  | Deferred Outflows<br>of Resources | of Resources | Net Deferred Outflows of Resources |
|--|-----------------------------------|--------------|------------------------------------|
| Differences between expected and actual experience Changes in assumptions Net difference between projected | \$ 554,213                        | \$ 23,972    | \$ 530,241                         |
|  | 576,138                           | 445,199      | 130,939                            |
| and actual earnings on pension plan investments Total  | 4,045,631                         | 2,040,169    | 2,005,462                          |

The schedule of funding progress, presented as RSI following the notes to the financial statements, presents multiyear trend information about whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liability for benefits.

There were no securities of the City or related parties included in the System's assets.

### Trend Information

Trend information gives an indication of the progress made in accumulating sufficient assets to pay benefits when due. Trend information is found in the required supplementary information section of the City's comprehensive annual financial report.

# Post-Retirement Health Care Benefits

Plan Description - The City provides post-retirement benefits for certain employees for current and future health insurance benefit expenses through a single-employer defined benefit plan. An actuarial valuation is made to determine whether the contributions are sufficient to meet the plan obligations. The latest actuarial valuation was made April 30, 2019.

The contribution requirements of plan members and the City are established and may be amended by the City. The actuarial valuation used the entry age method. The City currently funds the plan on a "pay as you go basis". The Plan is a single-employer defined benefit healthcare plan administered by the City. No assets are accumulated in a trust for the Plan. The City does not issue a separate report related to post-retirement healthcare benefits. The OPEB liability is mostly liquated by the General, Water, and Sewer Funds. Current year contributions were \$836,148, \$697,085 explicit payments and \$139,063 are implicit payments.

At April 30, 2019, the following employees were covered by the benefit terms:

| Inactive employees or beneficiaries currently |            |
|---|------------|
| receiving benefits                            | 85         |
| Inactive employees entitled to but not yet    |            |
| receiving benefits                            | -0-        |
| Active employees                              | 137        |
| Total   | <u>222</u> |

# Total OPEB Liability

The City's total OPEB liability was measured as of April 30, 2019, and was determined by an actuarial valuation as of that date under GASB Statement No. 75.

# Actuarial Assumptions and Other Inputs

The total OPEB liability in the April 30, 2019 actuarial valuation was determined using the following actuarial assumptions and other inputs, applied to all periods included in the measurement:

| Salary increase             | 2.75% including inflation |
|-----------------------------|---------------------------|
| Discount rate               | 3.79%                     |
| Healthcare cost trend rates | 8.0% for 4/30/19          |
|                             | decreasing to an ultimate |
|                             | rate of 5.0% for 2026 and |
|                             | later years               |

The discount rate was based on the 20 year bond GO index at the end of the fiscal year. The rate for the prior fiscal year was 3.97%.

Mortality rates were based on the RP-2014 Healthy Annuitant mortality table for males and females, as appropriate, with generational projection based on Scale MP-2016.

The Plan has not had a formal actuarial experience study performed.

# Changes in the Total OPEB Liability

|   | Total OPEB<br>Liability                                 |
|---|---|
| Balances at April 30, 2018  | \$9,717,256   |
| Changes for the year: Service cost Interest Changes of assumptions Benefit payments Net changes | 144,639<br>369,177<br>124,238<br>(836,148)<br>(198,094) |
| Balances at December 31, 2018   | \$9,519,162   |

Changes of assumptions and other inputs reflect a change in the discount rate from 3.97% in 2018 to 3.79% in 2019.

# Sensitivity of the Total OPEB Liability to Changes in the Discount Rate

The following presents the total OPEB liability of the City, calculated using the discount rate of 3.79%, as well as what the City's total OPEB liability would be if it were calculated using a discount rate that is 1% point lower (2.79%) or 1% point higher (4.79%) than the current discount rate:

|                      |              | Current Discount Rate (3.79%) |             |
|----------------------|--------------|-------------------------------|-------------|
| Total OPEB liability | \$10,323,149 | \$9,519,162                   | \$8,912,908 |

# Sensitivity of the Total OPEB Liability to Changes in the Healthcare Cost Trend Rates

The following presents the total OPEB liability of the City, calculated using the healthcare cost trend rates of 8.0% decreasing to 5.0% as well as what the City's total OPEB liability would be if it were calculated using healthcare cost trend rates that are 1% point lower (7.0% decreasing to 4.0%) or 1% point higher (9.0% decreasing to 6.0%) than the current healthcare cost trend rates:

|                      | 1% Decrease<br> |             | 1% Increase<br>Varies |  |
|----------------------|-----------------|-------------|-----------------------|--|
| Total OPEB liability | \$8,735,057     | \$9,519,162 | \$10,547,288          |  |

# OPEB Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to OPEB

For the year ended April 30, 2019, the City recognized OPEB expense of \$528,347. Deferred outflows and inflows of resources related to OPEB are from the following sources:

|                    | <u>Outflows</u>    | <u>Inflows</u> | Net Outflows |
|--------------------|--------------------|----------------|--------------|
| Assumption changes | \$109 <b>,</b> 707 | \$-0-          | \$109,707    |

Amounts reported as deferred outflows and inflows of resources related to OPEB will be recognized in OPEB expense as follows:

| For The<br>Years Ending<br>April 30 |                  |
|-------------------------------------|------------------|
| 2020                                | \$ 14,531        |
| 2021                                | 14,531           |
| 2022                                | 14,531           |
| 2023                                | 14,531           |
| 2024                                | 14,531           |
| Thereafter                          | 37,052           |
| Total                               | <u>\$109,707</u> |
|                                     |                  |

# Related Party Investments

During the year ended April 30, 2019, none of the above mentioned pension funds held securities issued by the City or other related parties.

# Note 7. COMMITMENTS

At April 30, 2019, the City had accepted bids on projects, contracts, or purchases which were not completed at that date. Major commitments were as follows:

| General Corporate Fund   |                       |
|--|-----------------------|
| Tri-state Mailing Systems  | \$ 570                |
| Mid America Fire & Safety - four thermal imaging cameras   | \$14,431              |
| Aquatic Zoo  |                       |
| Bevis Construction - Concrete Work   | \$36,360              |
| Furniture Leisure Commercial Site Finishing - 100 Lounge   |                       |
| Chairs   | \$20,614              |
| Recreonics, Inc Two Diving Boards  | \$8,652               |
| General Corporate Capital Fund   |                       |

# Eliminations

Interfund transfers are reported in the governmental activities and business-type activities fund financial statements. In the government-wide statements, interfund transfers are eliminated within the governmental activities column and within the business-type column.

# Purpose of Transfers

Transfers are used to (1) move revenues from the fund that State statute or City ordinances requires to collect them to the fund that State statutes or City ordinances requires to expend them, (2) move receipts restricted to debt service from the funds collecting the receipts to the debt service fund as debt service payments become due, and (3) use unrestricted revenues collected in the general fund to finance various programs accounted for in other funds in accordance with budgetary authorizations.

The City maintains two enterprise funds. The public utilities fund provides waterworks utility services and sanitary sewerage utility services. The sanitation fund provides for the collecting and disposing of refuse.

Segment information for the City's enterprise funds for the year ending April 30, 2019, is presented in the following table.

| Condensed Statement of Net Position  | Water                               | Sewer                         | Sanitation              |

# Note 9. CONTINGENT LIABILITIES AND RISK POOL PARTICIPATION

The City participates in a number of financial assistance programs that utilize Federal and State funds. Most of these programs are subject to program compliance audits by the grantors or their representatives. Some of the audits of these programs for or including the year ended April 30, 2019, have not yet been finalized. Accordingly, the City's compliance with applicable program requirements will be established at some future date. The amount, if any, of unrecorded liabilities to the granting agencies cannot be determined at this time although the City expects such amounts, if any, to be immaterial. Additionally, some financial assistance programs place restrictions on the use and disposition of certain property acquired with program funds.

The City is exposed to various risks of losses related to torts; theft of, damage to, and destruction of assets; errors and omissions; injuries to employees; and natural disasters. Starting September 1, 1997, the City of Mt. Vernon, Illinois elected to manage this risk by becoming a member of the Illinois Municipal League Risk Management Association. The IMLRMA insures hundreds of cities in Illinois for the purpose of operating and maintaining a cooperative program of self-insurance and risk management. The IMLRMA is a self-insured pool which is reinsured by Gen Reif, a major insurer. The City does not retain any risk of loss since the risk pool is backed by a major insurer for any short falls. No settlements have exceeded insurance coverage in the past three years.

Beginning January 1, 2008, the City created the health insurance fund (an Internal Service Fund) to administer the newly adopted self-insurance plan for employee health related benefits. use of this fund does not constitute a transfer of risk from the A stop loss insurance policy is purchased from a commercial insurance company to cover employee health care costs that exceed \$60,000 per employee or \$1,600,000 for the group per calendar year. The City has a third party administrator that is responsible for administering the plan and paying health claims as submitted by various medical billing offices. The third party administrator is Health Alliance. The City funds that have employees participate in the costs of the health insurance fund. Each fund with employees makes payments to the health insurance fund based upon amounts determined by the third party administrator of the plan. As of April 30, 2019, the monthly cost per employee was determined to be \$1,248. The insurance coverage is substantially the same as in prior years.

GASB Statement No. 10, Accounting and Financial Reporting for Risk Financing and Related Insurance Issues, as amended by GASB Statement No. 30, Risk Financing Omnibus, which requires that claims liabilities be based upon estimated ultimate costs of settling the claims. The liability also includes incurred but not reported claims (IBNR) developed through actuarial analysis of loss history and actual claims paid. Amounts due in future years on claims as of April 30, 2019, are recognized as a long-term liability in the statement of net position. Changes in the balance of estimated insurance claims payable for the years ended April 30, 2008 through 2019 are:

<sup>\*</sup>January 1, 2008 through April 30, 2008

## Note 10. TIF FUNDS

During the fiscal year ended April 30, 2009, the City created two Tax Increment Financing (TIF) funds. The Downtown TIF fund and the Homestead TIF fund. During the fiscal year ended April 30, 2010, the City created two additional TIF funds, Rt 15 and I-57 TIF and Industrial Park Construction TIF. Illinois statutes require that all TIF's file an annual TIF report with the IOC. Statutes also require a stand alone audit be submitted along with the TIF report for any TIF fund that has accumulated more than \$100,000 in incremental revenue. TIF funds that are below the \$100,000 threshold are allowed to submit the municipal audit report which includes the TIF fund reporting. The Downtown TIF, The Industrial Park Construction TIF, and the Route 15 and I-57 TIF required stand alone audits for April 30, 2019.

The TIF funds were created under the provisions of the Illinois' Tax Increment Allocation Redevelopment Act (65 ILCS 5/11-74).

Tax Increment Financing is simple in concept. TIF calls for local taxing bodies to make a joint investment in the development or redevelopment of an area, with the intent that any short-term gains be reinvested and leveraged so that all the taxing bodies will receive larger financial gains in the future. The funds for this investment do not come from current revenues, but from future tax revenues, not otherwise expected to occur. These new revenues are generated by increased public and private investment in identified, underperforming areas.

When a TIF redevelopment project area (often called a TIF district) is created, the value of the property in the area is established as the "base" amount. The property taxes paid on this base amount continue to go to the various taxing bodies as they always had, with the amount of this revenue declining only if the base declines (something that the TIF is expected to keep from happening) or the tax rate goes down. It is the growth of the value of the property over the base that generates the tax increment. This increment is collected into a special fund (the Special Tax Increment Allocation Fund) for use by the municipality to make additional investment in the TIF project area. This reinvestment generates additional growth in property value, which results in even more revenue growth for reinvestment.

In this way the TIF redevelopment project creates a vital cycle, increasing development and redevelopment in the area, such that when the TIF project ends - and Illinois law allows a TIF project to exist for a period of up to 23 years - all of the taxing bodies benefit from the new growth.

A tax increment is the difference between the amount of property tax revenue generated before TIF district designation and the amount of property tax revenue generated after designation. Establishment of a TIF does not reduce property tax revenues available to overlapping taxing bodies as the property taxes collected on properties included in the TIF at the time of designation continue to be distributed to them in the same manner as they would if the TIF did not exist. Only the new property taxes generated by the incremental increase in the value of these properties after the TIF is established are available for investment in the TIF.

## Note 11. ACCRETION OF BOND PREMIUM

Accretion of Series 2012 Bond Premium

The original bond premium of the Series 2012 bonds were \$1,002,413. This premium is being accreted over the 20 year life of the bonds based upon the effective interest rate method.

Current year accretion was \$41,585 leaving a balance of \$774,610 distributed in the following funds: General Corporate Capital \$271,914, Quality of Life \$427,643, Public Utilities \$75,053. Related accretion revenue for the years ended April 30, 2020 through April 30, 2033, is as follows:

|                   | General Corpo   | orate Capital  | Quality of Life |                 | Public (       | Jtilities       | Total            |            |

# Note 12. TAX ABATEMENT AGREEMENTS

# ENTERPRISE ZONE INCENTIVES

The City uses enterprise zone incentives to entice businesses to start or expand their businesses. These agreements are structured in accordance with the Illinois Enterprise Zone Program, which is designed to stimulate economic growth and neighborhood revitalization in economically depressed areas of the state through state and local tax incentives, regulatory relief and improved governmental services. Businesses located or expanding in an Illinois enterprise zone may be eligible for the following state and local tax incentives:

# STATE INCENTIVES AND EXEMPTIONS

- Exemption on retailers' occupation tax paid on building materials
- 2) An investment tax credit of 0.5% of qualified property
- 3) Expanded state sales tax exemptions on purchases of personal property used or consumed in the manufacturing process or in the operation of a pollution control facility
- 4) An exemption on the state utility tax for electricity and natural gas
- 5) An exemption on the Illinois Commerce Commission's administrative charge and telecommunication excise tax

# CITY INCENTIVES AND EXEMPTIONS

- Property tax exemption for a period of time, depending on the type and size of a project and/or the number of jobs being created
- 2) Abatement of the City's building permit, electrical permit, plumbing permit and excavation permit fees

Exemptions are available for companies that make minimum statutory investments that either create or retain a certain number of jobs. These exemptions require a business to make application to, and be certified by, the Illinois Department of Commerce.

Numerous Mt. Vernon businesses are participating in the City's enterprise zone program. Since the City is not subject to the Property Tax Extension Limitation Law, because of being a Home Rule Community, there is no property tax loss to the City from the enterprise zone program. This is also true in the special taxing district of the City. The loss of permit fees revenue is immaterial.

# TAX INCREMENT FINANCING INCENTIVES

The City has three Tax Increment Financing (TIF) Districts that are organized under the State's Tax Increment Financing Program which stimulate economic growth and neighborhood revitalization in economically depressed areas through local subsidy incentives. The TIF Districts provide City subsidies for eligible development expenses, that the City funds with property taxes assessed on the increased assessed value (increment) related to the improvements. No other county taxing districts besides the City receive these incremental property taxes for the life of the TIF, which is normally twenty-three years. The City has numerous local companies participating in its three TIF Districts. Since the City receives more property taxes under the TIF program than it would have otherwise, there are no property tax or other revenues lost from this program.

# Note 13. RESTATEMENT

For the fiscal year ended April 30, 2019, the City implemented GASB Statement No. 75, Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions. This standard establishes standards for governmental employer recognition, measurement, and presentation of information about other postemployment benefits (OPEB). To establish beginning balances for the net OPEB liability, the fiscal year ended April 30, 2018 ending net positions for the City's government-wide and enterprise fund financial statements were restated as follows:

# Government-Wide Financial Statements

The restatement required by GASB Statement No. 75 affected balance sheet accounts as presented below.

### NOTES TO SCHEDULE OF CONTRIBUTIONS SUMMARY OF ACTUARIAL METHODS AND ASSUMPTIONS ILLINOIS MUNICIPAL RETIRMENT FUND

Used in the Calculation of the 2018 Contribution Rate

Valuation Date:

December 31, 2018

Notes

Actuarially determined contribution rates are calculated as of December 31 each year, which is 12 months prior to the beginning of the fiscal year in which contributions are reported.

Methods and Assumptions Used to Determine 2018 Contribution Rates:

Actuarial Cost Method

Aggregate Entry Age Normal

Amortization Method

Level Percentage of Payroll, Closed

Remaining Amortization Period

Non-Taxing bodies: 10-year rolling period.

Taxing bodies (Regular, SLEP and ECO groups): 25-year closed period until remaining period reaches 15 years (then 15-year rolling period). Early Retirement Incentive Plan liabilities: A period up to 10 years selected by the Employer upon adoption of ERI. SLEP supplemental liabilities attributable to Public Act 94-712 were financed over 20 years for most employers (two employers were financed over 29 years).

Asset Valuation Method

#### NOTES TO SCHEDULE OF CONTRIBUTIONS SUMMARY OF ACTUARIAL METHODS AND ASSUMPTIONS ILLINOIS MUNICIPAL RETIRMENT FUND

Retirement Age

Experience-based table of rates that are specific to the type of eligibility condition. Last updated for the 2014 valuation pursuant to an experience study of the period 2011-2013.

Mortality

For non-disabled retirees, an I.M.R.F. specific mortality table was used with fully generational projection scale MP-2014 (base year 2012). The I.M.R.F specific rates were developed from the RP-2014 Blue Collar Health Annuitant Mortality Table with adjustments to match current I.M.R.F experience. For disabled retirees, an I.M.R.F specific mortality table was used with fully generational projection scale MP-2014 (base year 2012). The I.M.R.F specific rates were developed from the RP-2014 Disabled Retirees Mortality Table applying the same adjustment that were applied for nondisabled lives. For active members, an I.M.R.F specific mortality table was used with fully generational projection scale MP-2014 (base year 2012). The I.M.R.F specific rates were developed from the RP-2014 Employee Mortality Table with adjustments to match current I.M.R.F experience.

#### Actuarial Assumptions (Economic)

Discount rate used for the total pension liability 5.97%

Long-term expected rate of return on plan assets 6.75%

High quality 20 year tax exempt G.O. bond rate 3.79%

Projected individual salary increases 2.75% - 18.75%

Projected increase in total payroll 3.25%

Consumer price index (urban) 2.50%

Inflation rate included 2.50%

#### Actuarial Assumptions (Demographic)

Mortality table

Retirement rates

L&A 2016 Illinois Police Mortality Rates

L&A 2016 Illinois Police Retirement Rates capped at age 65

Disability rates

L&A 2016 Illinois Police Disability Rates

Termination rates

L&A 2016 Illinois Police Termination Rates

Percent married

80.0%

All rates shown in the economic assumptions are assumed to be annual rates, compounded on an annual basis. For more information on the selection of the actuarial assumptions, please see the assumption document prepared for the fund.

#### **ASSUMPTION CHANGES**

The assumptions were changed from the prior year.

The assumed rate on High Quality 20 Year Tax Exempt G.O. Bonds was changed from 3.97% to 3.79% for the current year. The underlying index used is The Bond Buyer 20-Bond G.O. Index as discussed in more detail later in this section. The choice of index is unchanged from the prior year. The rate has been updated to the current fiscal year end based on changes in market conditions as reflected in the index. The change was made to reflect our understanding of the requirements of GASB under Statement 67 and Statement 68.

The discount rate used in the determination of the Total Pension Liability was changed from 6.18% to 5.97%. The discount rate is impacted by a couple of metrics. Any change in the underlying High Quality 20 Year Tax Exempt G.O. Bond Rate will impact the blended discount rate.

In addition, there are changes that can be made that impact the projection of the net position of the fund. For example, changes in the formal or informal funding policy can impact the discount rate. Actual changes in the net position from one year to the next can impact the projections as well.

In the current valuation, we have updated the mortality assumption to include mortality improvements as stated in the most recently released MP-2016 table. In addition, the rates are being applied on a fully-generational basis. These changes were made to better reflect the future anticipated experience in the fund.

#### NOTES ON ACTUARIAL ASSUMPTIONS

#### Individual Pay Increases

Individual pay increases include provisions for annual cost of living increases, plus any additional increases in pensionable pay provided (step increases, longevity increases, promotions, educations, etc.). Sample rates are as follows:

| Service | _Rate_ | <u>Service</u> | <u>Rate</u> |
|---------|--------|----------------|-------------|
| 0       | 18.75% | 8              | 4.00%       |
| 1       | 2.75%  | 9              | 4.00%       |
| 2       | 3.40%  | 10             | 4.00%       |
| 3       | 3.41%  | 15             | 4.00%       |
| 4       | 3.40%  | 20             | 4.00%       |
| 5       | 3.40%  | 25             | 4.00%       |
| 6       | 4.00%  | 30             | 4.00%       |
| 7       | 4.00%  | 35             | 4.00%       |

#### Demographic Assumptions

Active mortality follows the Sex Distinct Raw Rates as developed in the RP-2014 study, with Blue Collar adjustment. These rates are improved generationally using MP-2016 improvement rates.

Retiree mortality follows the L&A Assumption Study for police 2016. These rates are experience weighted with the raw rates as developed in the RP-2014 study, with Blue Collar adjustment and improved generationally using MP-2016 improvement rates.

Disabled mortality follows the Sex Distinct Raw Rates as developed in the RP-2014 study for disabled participants, with Blue Collar adjustment. These rates are improved generationally using MP-2016 improvement rates.

Spouse mortality follows the Sex Distinct Raw Rates as developed in the RP-2014 study. These rates are improved generationally using MP-2016 improvement rates.

Other demographic assumption rates are based on a review of assumptions in the L&A 2016 study for Illinois police officers.

#### POSTEMPLOYMENT BENEFIT CHANGES

Eligibility for postemployment benefit increases is determined based on the Illinois pension code. Tier 1 police retirees are provided with an annual 3.0% increase in retirement benefits by statute when eligible. Tier 2 police retirees are provided postemployment benefit increases based on one-half of the Consumer Price Index (Urban) for the prior September.

108 (Continued)

## CITY OF MT. VERNON, ILLINOIS REQUIRED SUPPLEMENTARY INFORMATION NOTES TO SCHEDULE OF CONTRIBUTIONS SUMMARY OF ACTUARIAL METHODS AND ASSUMPTIONS POLICE PENSION

The CPI-U for September 1985 was 108.3. The CPI-U for September 2018 was 252.4. The average increase in the CPI-U for September 1985 through September 2018 was 2.61% (on a compounded basis).

#### EXPECTED RETURN ON PENSION PLAN INVESTMENTS

The long-term expected rate of return on assets is intended to represent the best estimate of future real rates of return and is shown for each of the major asset classes in the investment policy. The expected rates of return shown below have been provided by the investment professionals that work with the pension fund. The table below illustrates the best estimate of long-term expected real rates of return developed for each of the major asset classes, adjusted for expected inflation.

There are multiple approaches seen to providing these rates. Typically, the information is either based on capital market projections, or historical rates seen for the asset classes. We do not provide an opinion on the reasonableness of the returns provided nor the reasonableness of the approach used in the determination of the rates provided. The information provided is shown below for convenience.

The rates provided in the table below are based on an arithmetic average. The investment policy statement will provide more detail regarding the fund's policies on asset allocation targets and acceptable ranges.

|                   | Long-Term |              |                |            |
|-------------------|-----------|--------------|----------------|------------|
|                   | Expected  | Long-Term    | Long-Term      |            |
|                   | Rate of   | Inflation    | Expected Real  | Target     |
| Asset Class       | Return    | Expectations | Rate of Return | Allocation |
| Equities          | 10.00%    | 2.90%        | 7.10%          | 60.00%     |
| Fixed Income      | 5.10%     | 2.90%        | 2.20%          | 37.50%     |
| Mt. Vernon Police | 3.30%     | 2.90%        | 0.40%          | 2.50%      |

Long-term expected real rates of return under GASB are expected to reflect the period of time that begins when a plan member begins to provide service to the employer and ends at the point when all benefits to the plan member have been paid. The rates provided above are intended to estimate those figures.

The long-term inflation expectation is 2.90% and is included in the long-term expected rates of return. The long-term inflation expectation is from the same source as the long-term expected real rates of return, and is not necessarily reflective of the inflation measures used for other purposes in the report.

Geometric rates of return are equal to arithmetic rates of return when the annual returns exhibit no volatility over time. When arithmetic returns are volatile on a year-to-year basis, the actual realized geometric returns over time will be lower. Higher volatility results in a greater difference.

#### MUNICIPAL BOND RATE

The municipal bond rate assumption is based on The Bond Buyer 20-Bond G.O. Index. The rate shown earlier in this section of the report is the April 25, 2019 rate. The 20-Bond G.O. Index is based on an average of certain general obligation municipal bonds maturing in 20 years and having an average rating equivalent of Moody's Aa2 and Standard & Poor's AA.

The 20-Bond G.O. Index consists of 20 general obligation bonds that mature in 20 years. The average rating of the 20 bonds is roughly equivalent to Moody's Investors Service's Aa2 rating and Standard & Poor's Corp.'s AA.

The indexes represent theoretical yields rather than actual price or yield quotations. Municipal bond traders are asked to estimate what a current-coupon bond for each issuer in the indexes would yield if the bond was sold at par value. The indexes are simple averages of the average estimated yields of the bonds.

#### DISCOUNT RATE

The discount rate used in the determination of the total pension liability is based on a combination of the long-term expected rate of return on plan investments and the municipal bond rate.

Cash flow projections were used to determine the extent which the plan's future fiduciary net position will be able to cover future benefit payments. To the extent future benefit payments are covered by the plan's projected fiduciary net position, the long-term expected rate of return on plan investments is used to determine the portion of the net pension liability associated with those payments. To the extent future benefit payments are not covered by the plan's projected fiduciary net position, the municipal bond rate is used to determine the portion of the net pension liability associated with those payments.

Projected benefit payments are determined during the actuarial process based on the assumptions. More details on the assumptions are in the prior section. The expected contributions are based on the funding policy of the plan. The funding policy is discussed in more detail in the *Funding Policy* section of this report.

#### Actuarial Assumptions (Economic)

| Discount rate used for the total pension liability | 6.15%         |
|--|---------------|
| Long-term expected rate of return on plan assets   | 6.75%         |
| High quality 20 year tax exempt G.O. bond rate     | 3.79%         |
| Projected individual salary increases              | 3.50% - 7.05% |
| Projected increase in total payroll                | 3.25%         |
| Consumer price index (urban)                       | 2.50%         |
| Inflation rate included                            | 2.50%         |

#### Actuarial Assumptions (Demographic)

|                   | Naces  |  |
|-------------------|--|--|
| Retirement rates  | L&A 2016 Illinois Firefighters' Retirement<br>Rates capped at age 65 |  |
| Disability rates  | L&A 2016 Illinois Firefighters' Disability Rates                     |  |
| Termination rates | L&A 2016 Illinois Firefighters' Termination Rates                    |  |

80.0%

L&A 2016 Illinois Firefighters' Mortality

All rates shown in the economic assumptions are assumed to be annual rates, compounded on an annual basis. For more information on the selection of the actuarial assumptions, please see the assumption document prepared for the fund.

#### **ASSUMPTION CHANGES**

Percent married

Mortality table

The assumptions were changed from the prior year.

The assumed rate on High Quality 20 Year Tax Exempt G.O. Bonds was changed from 3.97% to 3.79% for the current year. The underlying index used is The Bond Buyer 20-Bond G.O. Index as discussed in more detail later in this section. The choice of index is unchanged from the prior year. The rate has been updated to the current fiscal year end based on changes in market conditions as reflected in the index. The change was made to reflect our understanding of the requirements of GASB under Statement 67 and Statement 68.

The discount rate used in the determination of the Total Pension Liability was changed from 6.55% to 6.15%. The discount rate is impacted by a couple of metrics. Any change in the underlying High Quality 20 Year Tax Exempt G.O. Bond Rate will impact the blended discount rate.

In addition, there are changes that can be made that impact the projection of the net position of the fund. For example, changes in the formal or informal funding policy can impact the discount rate. Actual changes in the net position from one year to the next can impact the projections as well.

In the current valuation, we have updated the mortality assumption to include mortality improvements as stated in the most recently released MP-2016 table. In addition, the rates are being applied on a fully-generational basis. These changes were made to better reflect the future anticipated experience in the fund.

#### NOTES ON ACTUARIAL ASSUMPTIONS

#### Individual Pay Increases

Individual pay increases include provisions for annual cost of living increases, plus any additional increases in pensionable pay provided (step increases, longevity increases, promotions, educations, etc.). Sample rates are as follows:

| <u>Service</u> | Rate  | <u>Service</u> | <u>Rate</u> |
|----------------|-------|----------------|-------------|
| 0              | 7.05% | 8              | 4.00%       |
| 1              | 3.50% | 9              | 4.00%       |
| 2              | 3.50% | 10             | 4.00%       |
| 3              | 3.50% | 15             | 4.00%       |
| 4              | 3.50% | 20             | 4.00%       |
| 5              | 3.50% | 25             | 4.00%       |
| 6              | 4.00% | 30             | 4.00%       |
| 7              | 4.00% | 35             | 4.00%       |

#### Demographic Assumptions

Active mortality follows the Sex Distinct Raw Rates as developed in the RP-2014 study, with Blue Collar adjustment. These rates are improved generationally using MP-2016 improvement rates.

Retiree mortality follows the L&A Assumption Study for firefighters' 2016. These rates are experience weighted with the raw rates as developed in the RP-2014 study, with Blue Collar adjustment and improved generationally using MP-2016 improvement rates.

Disabled mortality follows the Sex Distinct Raw Rates as developed in the RP-2014 study for disabled participants, with Blue Collar adjustment. These rates are improved generationally using MP-2016 improvement rates.

Spouse mortality follows the Sex Distinct Raw Rates as developed in the RP-2014 study. These rates are improved generationally using MP-2016 improvement rates.

Other demographic assumption rates are based on a review of assumptions in the L&A 2016 study for Illinois firefighters' officers.

#### POSTEMPLOYMENT BENEFIT CHANGES

Eligibility for postemployment benefit increases is determined based on the Illinois pension code. Tier 1 firefighter retirees are provided with an annual 3.0% increase in retirement benefits by statute when eligible. Tier 2 firefighter retirees are provided postemployment benefit increases based on one-half of the Consumer Price Index (Urban) for the prior September.

The CPI-U for September 1985 was 108.3. The CPI-U for September 2018 was 252.4. The average increase in the CPI-U for September 1985 through September 2018 was 2.61% (on a compounded basis).

#### EXPECTED RETURN ON PENSION PLAN INVESTMENTS

The long-term expected rate of return on assets is intended to represent the best estimate of future real rates of return and is shown for each of the major asset classes in the investment policy. The expected rates of return shown below have been provided by the State of Illinois Department of Insurance Actuarial Experience Study dated September 26, 2012. The table below illustrates the best estimate of long-term expected real rates of return developed for each of the major asset classes, adjusted for expected inflation.

|                                   | Long-Term<br>Expected<br>Rate of | Long-Term<br>Inflation | Long-Term<br>Expected Real |
|-----------------------------------|----------------------------------|------------------------|----------------------------|
| Asset Class                       | Return                           | Expectations           | Rate of Return             |
| US Large Cap Equity               | 8.30%                            | 2.50%                  | 5.80%                      |
| US Mid Cap Equity                 | 9.30%                            | 2.50%                  | 6.80%                      |
| US Small Cap Equity               | 9.30%                            | 2.50%                  | 6.80%                      |
| Non-US Developed Large Cap Equity |                                  |                        |                            |
| Unhedged                          | 8.40%                            | 2.50%                  | 5.90%                      |
| Emerging Markets Equity Unhedged  | 10.50%                           | 2.50%                  | 8.00%                      |
| US Corporate Bonds                | 4.20%                            | 2.50%                  | 1.70%                      |
| US Government Fixed Income        | 3.20%                            | 2.50%                  | 0.70%                      |
| US Cash                           | 3.00%                            | 2.50%                  | 0.50%                      |
| Global Real Estate - REITS        | 8.30%                            | 2.50%                  | 5.80%                      |
| Commodities - Long Only           | 4.90%                            | 2.50%                  | 2.40%                      |

Long-term expected real rates of return under GASB are expected to reflect the period of time that begins when a plan member begins to provide service to the employer and ends at the point when all benefits to the plan member have been paid. The rates provided above are intended to estimate those figures.

The long-term inflation expectation is 2.50% and is included in the long-term expected rates of return. The long-term inflation expectation is from the same source as the long-term expected real rates of return, and is not necessarily reflective of the inflation measures used for other purposes in the report.

Geometric rates of return are equal to arithmetic rates of return when the annual returns exhibit no volatility over time. When arithmetic returns are volatile on a year-to-year basis, the actual realized geometric returns over time will be lower. Higher volatility results in a greater difference.

#### MUNICIPAL BOND RATE

The municipal bond rate assumption is based on The Bond Buyer 20-Bond G.O. Index. The rate shown earlier in this section of the report is the April 25, 2019 rate. The 20-Bond G.O. Index is based on an average of certain general obligation municipal bonds maturing in 20 years and having an average rating equivalent of Moody's Aa2 and Standard & Poor's AA.

The 20-Bond G.O. Index consists of 20 general obligation bonds that mature in 20 years. The average rating of the 20 bonds is roughly equivalent to Moody's Investors Service's Aa2 rating and Standard & Poor's Corp.'s AA.

The indexes represent theoretical yields rather than actual price or yield quotations. Municipal bond traders are asked to estimate what a current-coupon bond for each issuer in the indexes would yield if the bond was sold at par value. The indexes are simple averages of the average estimated yields of the bonds.

#### DISCOUNT RATE

The discount rate used in the determination of the total pension liability is based on a combination of the long-term expected rate of return on plan investments and the municipal bond rate.

Cash flow projections were used to determine the extent to which the plan's future fiduciary net position will be able to cover future benefit payments. To the extent future benefit payments are covered by the plan's projected fiduciary net position, the long-term expected rate of return on plan investments is used to determine the portion of the net pension liability associated with those payments. To the extent future benefit payments are not covered by the plan's projected net position, the municipal bond rate is used to determine the portion of the net pension liability associated with those payments.

Projected benefit payments are determined during the actuarial process based on the assumptions. More details on the assumptions are in the prior section. The expected contributions are based on the funding policy of the plan. The funding policy is discussed in more detail in the *Funding Policy* section of this report.

#### SCHEDULE OF INVESTMENT RETURNS

|         | Annual Money               | Annual Money-Weighted Rate of     |  |  |  |  |  |  |
|---------|----------------------------|-----------------------------------|--|--|--|--|--|--|
|         | Return, Net o              | Return, Net of Investment Expense |  |  |  |  |  |  |
|         | Police Pension Firefighter |                                   |  |  |  |  |  |  |
| 4/30/19 | 5.40%                      | 1.69%                             |  |  |  |  |  |  |
| 4/30/18 | 8.71%                      | 7.54%                             |  |  |  |  |  |  |
| 4/30/17 | 10.78%                     | 11.84%                            |  |  |  |  |  |  |
| 4/30/16 | (2.16%)                    | (2.61%)                           |  |  |  |  |  |  |
| 4/30/15 | 7.13%                      | 4.32%                             |  |  |  |  |  |  |

#### SCHEDULE OF CHANGES IN THE TOTAL OPEB LIABILITY

| Total OPEB liability  | 4/30/19  |
|---|--|
| Service cost Interest Changes of benefit terms Differences between expected and actual experience Changes in assumptions Benefit payments Net change in total OPEB liability                                      | \$ 144,639<br>369,177<br>-0-<br>-0-<br>124,238<br>(836,148)<br>(198,094) |
| Total OPEB liability - beginning<br>Total OPEB liability - ending (a)   | 9,717,256<br>\$9,519,162   |
| OPEB plan net position    Contributions - employer    Contributions - member    Contributions - other    Net investment income    Benefit payments    Administrative expense Net change in OPEB plan net position | \$ 836,148<br>-0-<br>-0-<br>-0-<br>(836,148)<br>-0-<br>-0-               |
| Total OPEB plan net position - beginning<br>Total OPEB plan net position - ending (b)   | <u> </u>   |
| <pre>Employer's total OPEB liability/(asset) - ending (a) - (b)</pre>   | <u>\$9,519,162</u>   |
| Covered-employee payroll<br>Employer's total OPEB liability as a percentage   | \$7,565,742  |
| of covered-employee payroll Contribution from other City resources (actuarily determined contribution)  | 125.82%<br>\$ 836,148  |

There is no ADC or employer contribution in relation to the ADC, as there is no trust that exists for funding the OPEB liability. However, the City did make benefit payments from other City resources in the current year in the amount of \$836,148.

Information is not available for fiscal year prior to 4/30/19.

| Actuarial valuation date      | May 1, 2018                           |  |  |  |  |  |  |  |
| Data date                     | April 30, 2019                        |  |  |  |  |  |  |  |
| Asset valuation method        | Market value                          |  |  |  |  |  |  |  |
| Actuarial cost method         | <pre>Entry age normal (level %)</pre> |  |  |  |  |  |  |  |

Methodology Used in the Determination of Deferred Inflows and Outflows of Resources

| Amortization | method | Straight | line |
|--------------|--------|----------|------|
|              |        |          |      |

Amortization period
Actuarial experience 8.55 years
Changes in assumptions 8.55 years
Asset experience 5.00 years

As noted in the table above, the actuarial funding method used in the determination of the total OPEB liability is the entry age normal cost method (level percent of pay). The method allocates normal cost contributions by employee over the working career of the employee as a level percent of their pay.

### 116 (Continued)

The total OPEB liability for the current fiscal year has been developed based on the actuarial valuation date shown above, and adjusted to the measurement date shown above, based on procedures that conform to generally accepted actuarial principles and practices.

Mortality Rates

Active IMRF mortality follows the sex distinct raw rates as developed in the RP-2014 study. These rates are improved generationally using MP-2017 improvement rates and weighted based on the IMRF December 31, 2017 actuarial valuation.

Retiree and spousal IMRF mortality follows the sex distinct raw rates as developed in the RP-2014 study, with blue collar adjustment. These rates are improved generationally using MP-2017 improvement rates.

Active firefighter mortality follows the sex distinct raw rates as developed in the RP-2014 study, with blue collar adjustment. These rates are improved generationally using MP-2016 improvement rates.

Retiree firefighter mortality follows the L&A assumption study for firefighters 2016. These rates are experience weighted with the raw rates as developed in the RP-2014 study, with blue collar adjustment and improved generationally using MP-2016 improvement rates.

Active police mortality follows the sex distinct raw rates as developed in the RP-2014 study, with blue collar adjustment. These rates are improved generationally using MP-2016 improvement rates.

Retiree police mortality follows the L&A assumption study for police 2016. These rates are experience weighted with the raw rates as developed in the RP-2014 study, with blue collar adjustment and improved generationally using MP-2016 improvement rates.

Disabled mortality follows the sex distinct raw rates as developed in the RP-2014 study for disabled participants. These rates are improved generationally using MP-2016 improvement rates.

Spouse mortality follows the sex distinct raw rates as developed in the RP-2014 study. These rates are improved generationally using MP-2016 improvement rates.

#### ASSUMPTION CHANGES

Because this is implementation year of GASB 74/75, the beginning total OPEB liability is based on the same data and plan provisions as the ending total OPEB liability. For the purpose of developing changes in OPEB liability for GASB 74/75 reporting, the only change in assumptions was the discount rate.

#### EXPECTED RETURN ON OPEB PLAN INVESTMENTS

There is currently no expectation for future returns on OPEB plan assets since the OPEB obligation is an unfunded obligation. The employer does not have a trust dedicated exclusively to the payment of OPEB benefits.

#### MUNICIPAL BOND RATE

The municipal bond rate assumption is based on The Bond Buyer 20-Bond G.O. Index. The beginning of year rate shown earlier in the assumption section is the April 26, 2018 rate, and the end of year rate shown is the April 25, 2019 rate. The 20-bond G.O. index is based on as average of certain general obligation municipal bonds maturing in 20 years and having an average rating equivalent of Moody's Aa2 and Standard & Poor's AA.

The 20-bond index consists of 20 general obligation bonds that mature in 20 years. The average rating of the 20 bonds is roughly equivalent to Moody's Investors Service's Aa2 rating and Standard & Poor's Corp.'s AA.

The indexes represent theoretical yields rather than actual price or yield quotations. Municipal bond traders are asked to estimate what a current-coupon bond for each issuer in the indexes would yield if the bond was sold at par value. The indexes are simple averages of the average estimated yields of the bonds.

#### DISCOUNT RATE

The discount rate used in the determination of the total OPEB liability is based on a combination of the expected long-term rate of return on plan assets and the municipal bond rate. If the employer does not have a trust dedicated exclusively to the payment of OPEB benefits, as is the case with the City of Mt. Vernon, Illinois, then only the municipal bond rate is used in determining the total OPEB liability.

If the postretirement plan is funded, cash flow projections are used to determine the extent which the plan's future net position will be able to cover future benefit payments. To the extent future benefit

### 118 (Continued)

payments are covered by the plan's projected net position, the expected rate of return on plan investments is used to determine the portion of the net OPEB liability associated with those payments. To the extent future benefit payments are not covered by the plan's projected net position, the municipal bond rate is used to determine the portion of the net OPEB liability associated with those payments.

Projected benefit payments are determined during the valuation process based on the assumptions. More details on the assumptions are in the prior section. The expected contributions are based on the funding policy of the plan. The funding policy is discussed in more detail in a later section.

#### INFLATION RATE

The long-term inflation expectation used is 2.50%, which is an underlying component of the discount rate and assumed health care trend rates.

#### DEVELOPMENT OF STARTING CLAIMS COSTS

Starting costs for the City's plan were developed based on the blended premiums charged for coverage. The insurance carrier charges actives and retirees the same premium rates. According to GASB, when an employer provides benefits to both active employees and retirees through the same plan, the benefits to retirees should be segregated and measured independently for actuarial measurement purposes. The projection of future retiree benefits should be based on claims costs, or age-adjusted premiums approximating claims costs, for retirees. As such, premiums were estimated for under-65 retirees and their spouses as if they were rated on a stand-alone basis. The results were then disaggregated into age-specific starting costs based on average ages and assumptions on the relationship between costs and increasing age.

The City's budget is prepared using the G.A.A.P. basis of accounting. Therefore, a reconciliation is not required.

The City had an excess of expenditures over budgeted amounts which have been detailed in Note 8.

INDEPENDENT AUDITORS'
REPORT ON INTERNAL CONTROL OVER
FINANCIAL REPORTING AND ON

ON AN AUDIT OF FINANCIAL STATEMENTS
PERFORMED IN ACCORDANCE WITH
GOVERNMENT AUDITING STANDARDS

COMPLIANCE AND OTHER MATTERS BASED

Honorable Mayor and Members of the City Council City of Mt. Vernon, Illinois

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the City of Mt. Vernon, Illinois, as of and for the year ended April 30, 2019, and the related notes to the financial statements, which collectively comprise the City of Mt. Vernon, Illinois' basic financial statements and have issued our report thereon dated October 11, 2019.

#### Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered the City of Mt. Vernon, Illinois' internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the City of Mt. Vernon, Illinois' internal control. Accordingly, we do not express an opinion on the effectiveness of the City of Mt. Vernon, Illinois' internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on

a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

#### Compliance and Other Matters

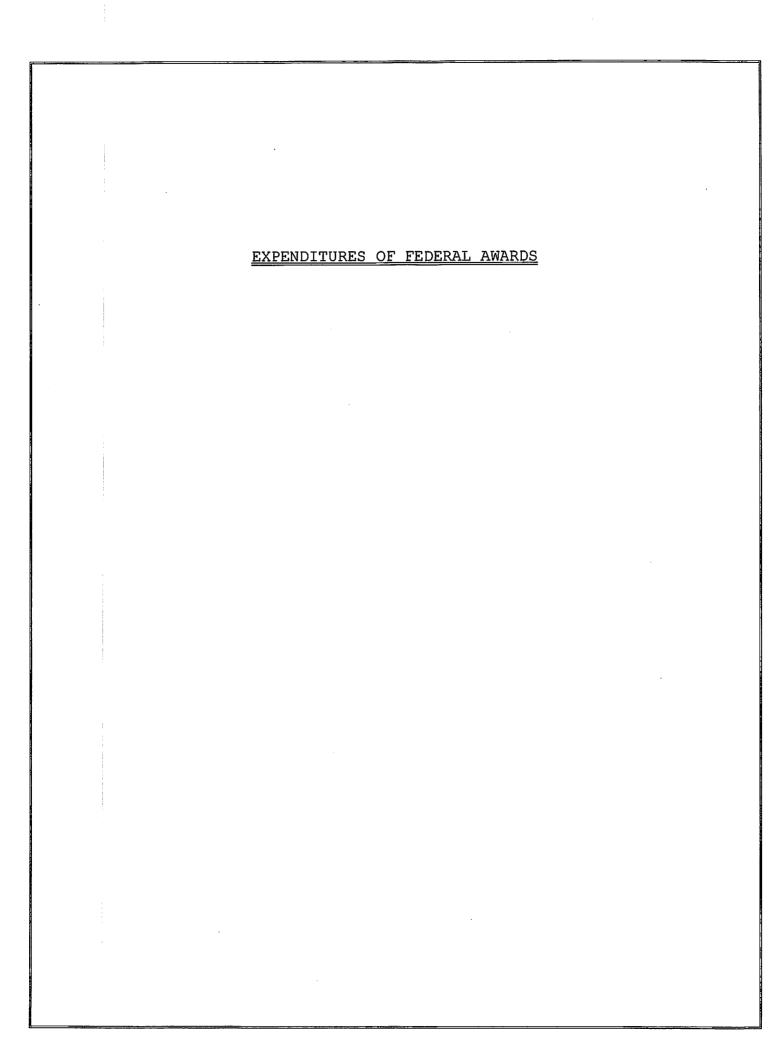

As part of obtaining reasonable assurance about whether the City of Mt. Vernon, Illinois' financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under Government Auditing Standards.

#### Purpose of This Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

INDEPENDENT AUDITORS' REPORT ON COMPLIANCE FOR EACH MAJOR PROGRAM AND ON INTERNAL CONTROL OVER COMPLIANCE REQUIRED BY THE UNIFORM GUIDANCE

Honorable Mayor and Members of the City Council City of Mt. Vernon, Illinois

#### Report on Compliance for Each Major Federal Program

We have audited the City of Mt. Vernon, Illinois' compliance with the types of compliance requirements described in the OMB Compliance Supplement that could have a direct and material effect on each of the City of Mt. Vernon, Illinois' major federal programs for the year ended April 30, 2019. City of Mt. Vernon, Illinois' major federal programs are identified in the summary of auditors' results section of the accompanying schedule of findings and questioned costs.

#### Management's Responsibility

Management is responsible for compliance with federal statues, regulations, and the terms and conditions of its federal awards applicable to its federal programs.

#### Auditors' Responsibility

Our responsibility is to express an opinion on compliance for each of the City of Mt. Vernon, Illinois' major federal programs based on our audit of the types of compliance requirements referred to above. We conducted our audit of compliance in accordance with the auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States; and the audit requirements of Title 2 U.S. Code of Federal Regulations Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (Uniform Guidance). Those standards and the Uniform Guidance require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about the City of Mt. Vernon, Illinois' compliance with those requirements and performing such other procedures as we considered necessary in the circumstances.

We believe that our audit provides a reasonable basis for our opinion on compliance for each major federal program. However, our audit does not provide a legal determination of the City of Mt. Vernon, Illinois' compliance.

#### Opinion on Each Major Federal Program

In our opinion, the City of Mt. Vernon, Illinois, complied, in all material respects, with the types of compliance requirements referred to above that could have a direct and material effect on each of its major federal programs for the year ended April 30, 2019.

#### Report on Internal Control Over Compliance

Management of the City of Mt. Vernon, Illinois, is responsible for establishing and maintaining effective internal control over compliance with the types of compliance requirement referred to above. In planning and performing our audit of compliance, we considered the City of Mt. Vernon, Illinois' internal control over compliance with the types of requirements that could have a direct and material effect on each major federal program to determine the auditing procedures that are appropriate in the circumstances for the purpose of expressing an opinion on compliance for each major federal program and to test and report on internal control over compliance in accordance with the Uniform Guidance, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the City of Mt. Vernon, Illinois' internal control over compliance.

A deficiency in internal control over compliance exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. A material weakness in internal control over compliance is a deficiency, or a combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis. A significant deficiency in internal control over compliance is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of the Uniform Guidance. Accordingly, this report is not suitable for any other purpose.

### CITY OF MT. VERNON, ILLINOIS NOTES TO SCHEDULE OF EXPENDITURES OF FEDERAL AWARDS April 30, 2019

#### Note 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

#### General

The accompanying Schedule of Expenditures of Federal Awards presents the activity of all federal award programs of the City of Mt. Vernon, Illinois. The City's reporting entity is defined in Note 1 to the City's financial statements. Federal awards passed through other government agencies are included on the schedule.

#### Basis of Accounting

The accompanying Schedule of Expenditures of Federal Awards is presented using the modified accrual basis of accounting for all governmental funds and the accrual basis of accounting for all proprietary funds, which is described in Note 1 to the City's financial statements. The information in this schedule is presented in accordance with the requirements of Title 2 U.S. Code of Federal Regulations Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (Uniform Guidance). Therefore, some amounts presented in this schedule may differ from amounts presented in or used in the preparation of the general purpose financial statements.

#### Relationship to General Purpose Financial Statements

Federal awards received are reflected in the City's financial statements within the governmental funds as grants, entitlements, and subsidies, within the proprietary funds as equity contribution from the federal government.

#### Relationship to Program Financial Reports

Amounts reported in the accompanying Schedule of Expenditures of Federal Awards agree with amounts reported in the Program Financial Reports for programs which have filed reports with the federal awarding agency.

#### Note 2. FEDERAL LOANS

The City had no outstanding loan balances or loan guarantees at  $April\ 30$ , 2019.

#### Note 3. INDIRECT COST RATE

The City has elected not to use the 10% de minimis indirect cost rate allowed under the Uniform Guidance.

#### Note 4. NONCASH FEDERAL ASSISTANCE

The City received no noncash assistance, such as rent, food commodities, or donated property (including donated surplus property) as of April 30, 2019.

#### CITY OF MT. VERNON, ILLINOIS SCHEDULE OF FINDINGS AND QUESTIONED COSTS April 30, 2019

#### A. SUMMARY OF AUDITORS' RESULTS

- 1. The auditors' report expresses an unqualified opinion on the financial statements of the City of Mt. Vernon, Illinois.
- 2. No reportable conditions relating to the audit of the financial statements are reported in the Report on Internal Control Over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with Government Auditing Standards.
- 3. No instances of noncompliance material to the financial statements of the City of Mt. Vernon, Illinois were disclosed during the audit.
- 4. No reportable conditions relating to the audit of the major federal award programs is reported in the Report on Compliance for Each Major Program and on Internal Control Over Compliance Required by the Uniform Guidance.
- 5. The auditors' report on compliance for the major federal award programs for the City of Mt. Vernon, Illinois expresses an unqualified opinion.
- 6. Our audit disclosed no findings required to be reported related to Federal programs under Section 2 CFR 200.516(a) of the Uniform Guidance.
- 7. The program tested as a major program included:

| CFDA Numbers | Name of Federal Program                         |
|--------------|---|
| 11.300       | Public Works Assistance - Industrial Park Grant |

- 8. The threshold for distinguishing Types A and B programs was expended amounts in excess of \$750,000.
- 9. The City of Mt. Vernon, Illinois was determined to be a high-risk auditee.

#### CITY OF MT. VERNON, ILLINOIS SCHEDULE OF FINDINGS AND QUESTIONED COSTS April 30, 2019

#### B. FINDINGS - FINANCIAL STATEMENTS AUDIT

There were no findings or questioned costs relating to the audit of the financial statements for the year ended April 30, 2019, which are required to be reported in accordance with *Government Auditing Standards*. No corrective action plan is required because there were no findings required to be reported under the Federal Single Audit Act.

#### C. FINDINGS AND QUESTIONED COSTS - MAJOR FEDERAL AWARD PROGRAM AUDIT

There were no findings or questioned costs relating to the audit of the major federal award programs for the year ended April 30, 2019, which are required to be reported in accordance with Title 2 U.S. Code of Federal Regulations Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (Uniform Guidance). No corrective action plan is required because there were no findings required to be reported under the Federal Single Audit Act.
